## TECHNOLOGIES DEVELOPMENT HISTORY

---

Tatyana Petrovna Konopleva

Chairwoman of the board of Directors  
Founder of Deta Elis Holding

A handwritten signature in blue ink, appearing to read 'T. Konopleva', written in a cursive style.

Academician of medical and technical sciences and an expert in the field of bioresonance - manages the company for more than 20 years. Under her leadership, new compact and easy-to-use devices were created, representative offices were opened in Europe and Central Asia. She managed to bring the application of bioresonance technologies to a new level. Her belief in the comprehensive approach to health protection and recovery has made the technology more accessible for ordinary people. Dr. Konopleva continues educating the public about the correct and efficient use of bio-resonance technologies.

Agnieszka Zaleska

Director of Deta Elis Greece  
Head of Promotion in Europe

A handwritten signature in blue ink, appearing to read 'A. Zaleska', written in a cursive style.

Since 2013 she has taken over the leadership of Greece, which has become the core of development of all European countries. Doctor of European History from the University of Moscow, Russian Federation. Philologist of Polish & Russian Language. Pedagogue. Many years of experience in the organization, management and development of global companies. Holder of numerous management and company promotion credentials. Expert in market analysis. Under her leadership, DEHolding established itself on the European market.

---

## ABOUT THE TECHNOLOGIES

---

DeVita technologies are based on bio-resonance therapy methods developed by Russian and foreign scientists. They work on two basic principles:

- The Recovery principle is embodied in the devices DeVita Ritm+, DeVita Energy 11 and DeVita Cosmo. These devices generate electromagnetic field impulses in the low frequencies range, which coincide with physiological and regulatory frequencies of our body. Each of the programs creates the resonance in the relevant organs and systems.
- The Antimicrobial principle is embodied in the device DeVita AP+. Its action is based on the emission of electromagnetic waves which resonate with the vibrations of various parasites: from viruses to helminthes. DeVita AP+ acts against pathogens that gives the body the opportunity to function naturally unaffected by external factors or conditions.

---

## SCIENTIFIC DEVELOPMENT

---

DEHolding Company has been in development for more than 20 years. The company began its exploration of the devices based on the research of the following esteemed scientists:

Alexandr Gavrilovich Gurvich

The scientist who established the fact that any organism consisting of many cells has an electromagnetic field generated by those cells. As a result, the electromagnetic field of the individual organism comes into existence, and this field is essential for the organization of physiological processes.

Royal Raymond Rife

Fixating individual frequencies of various pathogens and inserting them into resonance, Rife showed a new method of struggle against dangerous microorganisms. It is worth noting that such exposure is safe for human cells. The scientist has created an extensive list of frequencies of microorganisms affecting the human body.

Reinhold Voll

Voll found that therapeutic effect of electrical currents at acupuncture points depend on their frequency. And even the slightest change in frequency may have different therapeutic effects. Contributions to the development of this study were also made by such scholars as F. Kramer, O. Klaus and P. Schmidt.

Helmut Schimmel

Schimmel, the founder of the modern BRT-method, diminished the number of working points down to one and transformed the principle of measurement “placing the organs into ampoules”. Before Schimmel, the condition of the organs were measured via different points. Now only one “reproducible” point is the source of information and the drug-indicators are tested directly at this point.

# DEVITA DEVICES EVOLUTION

The study of bio-resonance is more than 100 years old. Our products are the culmination of the best of all the discoveries and creations that have been brought to life so far.

# THE HOMO-TOXICOSIS THEORY OF DR. RECKEWEG

Heinz Heinrich Reckeweg,

MD, researcher.

Dr. Reckeweg created the homo-toxicosis theory which considers toxins as the main source of health problems. Dr. Reckeweg was the founder of the new direction in health improvement and recovery, which puts at the forefront the body's cleansing and detoxification.

DEHolding Company has successfully worked with this theory for a number of years: all the drainage programs in DeVita devices are created according to the method of Dr. Reckeweg, who believed that all human illnesses are the consequence of the accumulation of homo-toxins. Toxic substances (homo-toxins) cause defensive reactions in the human body, which are manifestations of the disease. Homo-toxins, as considered by Dr. Reckeweg, are chemical, bio-chemical, physical and psychical factors that disrupt human health. According to the homo-toxicosis theory, the toxins can have either external or internal origins.

## HOW DOES THE INTOXICATION EMERGE?

### ORIGIN OF TOXINS?

#### EXTERNAL FACTORS

- infection pathogens
- chemical pollution
- geo-pathogen zones
- radiation
- stress
- bad habits

#### INTERNAL FACTORS

- intermediate products of metabolism
- final products of metabolism
- intestinal dysbacteriosis

LEADS TO

### INSUFFICIENT CLEANSING OF THE BODY

WHICH CREATES

accumulation of toxins  
in body cells

disruption  
of metabolism

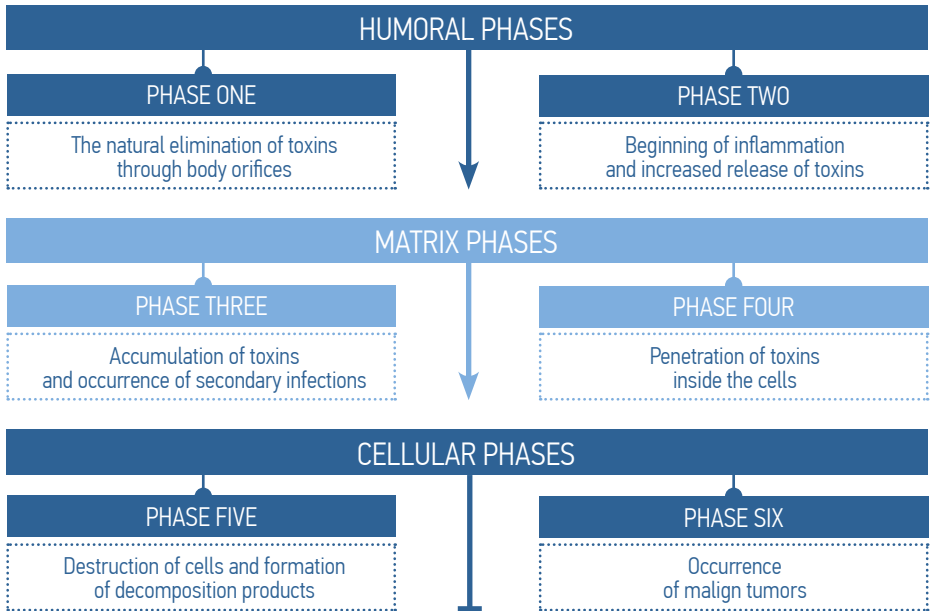

disruption of recovery  
and rehabilitation

disorder of the endocrine,  
nervous and immune  
systems

# HOW DOES AN ILLNESS DEVELOP?

Dr. Reckeweg identified 6 phases of the passage of homo-toxic reactions. Each phase reflects a lesion of deeper structures of the body and more severe changes. For the first two phases the body detoxifies itself adequately without harm for its livelihood. During the third and fourth phases the toxins accumulate in the body tissues which become super-saturated with them. At the fifth phase irreversible consequences begin which can lead to very sad circumstances.

## THE SIX PHASES OF DEVELOPMENT OF THE BODY'S REACTION TO TOXINS

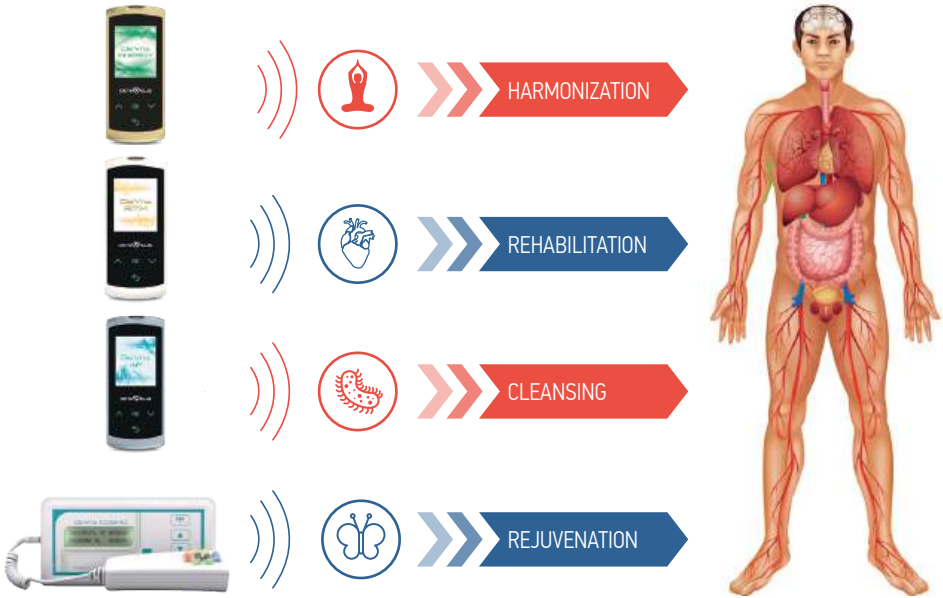

- GENETIC INHERITANCE
- VACCINATIONS
- ILLNESSES
- ANTIBIOTICS
- TOXINS
- ANTIBIOTICS
- ILLNESSES
- VACCINATIONS
- GENETIC INHERITANCE
- VACCINATIONS
- ILLNESSES
- ANTIBIOTICS
- TOXINS
- ANTIBIOTICS
- ILLNESSES
- VACCINATIONS
- GENETIC INHERITANCE

---

## HOW DO THE TECHNOLOGIES WORK?

---

According to the homo-toxicosis theory the recovery process follows in reverse order. It is very important not to miss all the "points of the recovery". DeVita technologies allow the implementation of maximum deep cleansing of the body which not only withdraws the symptoms but leads to the complete elimination of the problem.

---

## ADVANTAGES OF THE DEVICE

---

**SAFETY**  
it has a minimum  
of contraindications

**EFFECTIVENESS**  
the technologies are recognized by  
leading scientific organizations

**PORTABILITY**  
an accessible device  
always at hand

**VERSATILITY**  
use the device for  
whole-body wellness

**SIMPLICITY**  
easy interface  
and patterns of use

**RELEVANCE**  
download additional  
programs that are right for you

---

# PRINCIPLE OF OPERATION

---

DeVita technologies are based on irradiation of super-weak electromagnetic waves which influence the whole body and individual organs due to the bio-resonance effect. The bio-resonance is strengthening the natural oscillations of organs due to electromagnetic waves of the same frequency. Bio-resonance irradiation of the DeVita devices can be estimated by an oscillograph, the instrument for monitoring and measuring the electromagnetic waves.

## ELECTROMAGNETIC ACTION OF DEVITA AP+

The action is adjusted to oscillations of pathogenic microorganisms. Anti-parasite irradiation deactivates pathogenic microbes and ensures their safe removal from the body.

---

## BIORESONANCE ACTION OF DEVITA RITM+

This is similar to electromagnetic oscillations of healthy organs. The organs of our body are constantly affected by pathogenic oscillations and lose their healthy rhythm. DeVita Ritm+ 'readjusts' the organs to the healthy oscillations.

---

## ELECTROMAGNETIC ACTION OF DEVITA ENERGY 11

The action of this device is based on the principle of 'floating frequencies'; such radiation is quickly and efficiently perceived by the body. That's why the DeVita Energy 11 device restores vitality and energy of the organism.

## V.N. SHABALIN

---

Positive comment  
on DeVita technologies

from the Academician  
of the Russian Academy of Medical  
Sciences, Doctor of Medical Sciences,  
Professor, President of Gerontologists  
and Geriatrists Association of  
the Russian Federation Dr. Shabalin:

Health-saving technologies and series of DeVita electromagnetic (bio-resonance) therapy devices by the Russian company DETA-ELIS HOLDING are the perfect example of comprehensive health improvement innovations.

Bio-resonance therapy is a new, rather promising trend in clinical and preventing medicine. The aim of the trend is to evaluate and adjust health state, functional activity and energy resources of human organs and systems.

Strengthening of healthy and weakening of pathogenic electromagnetic oscillations in a human body is the efficient outcome of DeVita technologies which improve life quality. In order to intensify innovative development of health care system of the Russian Federation, to boost the availability and quality of high-tech medical care for ordinary people including elderly persons, to promote the advancement of national innovative projects, also considering the experience and the positive results of DeVita electromagnetic therapy innovative technologies, it is essential to develop scientific research facilities and manufacture of DeVita bio-resonance therapy devices by DETA-ELIS HOLDING for their extensive application.

---

## B.I. LEONOV

---

### Positive comment on DeVita technologies

from the President of the Russian Academy for Medical and Technical Sciences, Doctor of Engineering Sciences, Professor, Honored Scientist Dr. Leonov:

Health improvement innovations based on bio-resonance therapy are the promising trend in medical rehabilitation. The principle of the method consists of improvement of body functions by means of influence of resonance electro-magnetic oscillations. These oscillations are attributable to irradiation of live organisms intended to both neutralization of pathogens and regeneration of healthy oscillations which were impaired at pathogenic conditions, in other words for harmonization of wave processes in a human body.

In this market segment DeVita electro-magnetic therapy technologies of the Russian DETA-ELIS HOLDING Company have very serious positions. DeVita devices are meant for the enhancement of genuine body defenses and correction of natural genuine electro-magnetic radiations of bio-systems.

DeVita technology application is aimed at strengthening of healthy and weakening of pathogenic oscillations in a body, accomplishing health improvement function.

DeVita bio-resonance therapy technologies of DETA-ELIS HOLDING can be widely used for preventive and health improvement purposes. It can be used as an effective extra tool for rehabilitation medicine.

Positive comment  
on DeVita technologies

from Doctor of Medical Sciences,  
Professor, , Head of clinical diagnostic  
laboratory of Moscow Regional  
Research and Clinical Institute  
n.a. M.F. Vladimirovsky  
(extract from the interview):

...Thank you for your gift, this device; now I'll do it before the use, and only after that I will take a blood sample in-vitro and will check what it is. But I want to say, what is going on in general. Your operating modes, your waves that you streamline and the movement vector are perfectly right. And I admire the inventor of these modes <...> - you've chosen the right vector. ... Readjustment of both intra-molecular and inter-molecular interactions happens with the help of your oscillating processes.

Of course, I am fascinated by your inventions and devices. We have seen that morphologically. It was so wonderful because from the very beginning it was so unbelievable with some skepticism. But now we are so interested in that. You just sit and work, then you get surprised when see such regularity. The patients have different diseases, that's why the results differ, but the regularity exists, absolutely, in the majority of cases.

## **Акт приёмки-сдачи**

продукции, полученной в результате Договора возмездного оказания услуг № 111 / 4-П от «17» августа 2015г. между ООО «ДЭТА-ЭЛИС ХОЛДИНГ» (Заказчик) и ФГБНУ «НИИОПП» (Исполнитель)

*Москва, 04.09. 2015 г.*

**В соответствии с условиями "Договора", "Исполнитель" по заданию "Заказчика" провел оценку эффективности прибора «DeVita RITM, DeVita AP, DeVita ENERGY».**

### **Условия проведения исследования:**

1. Для исследования взято 20 образцов сыворотки крови больных терапевтического, эндокринологического, педиатрического, дерматовенерологического и гастроэнтерологического отделений многопрофильного научно-клинического института г. Москвы.

2. Сыворотка крови каждого пациента разделена на 6 пробирок по 100 мкл:  
0 – контроль (без воздействия);  
1 – общий режим;  
2 – режим улучшения кровообращения;  
3 – режим детоксикации;  
4 – режим «Лимфодренаж»;  
5 – режим повышения уровня энергии.

3. На каждый образец сыворотки крови (всего 600) было оказано электромагнитное воздействие аппаратом «DeVita RITM, DeVita AP, DeVita ENERGY» по заложенным в нём различным программам.

4. После электромагнитного воздействия, методом клиновидной дегидратации получили твёрдофазные структуры сыворотки крови, в которых оценивали системную и локальную организацию непосредственно после воздействия электромагнитным полем, и спустя сутки после воздействия. Полученные результаты сравнивали с контрольными образцами (группа 0).

### **Результаты исследований**

Изучены морфологические особенности фаший сывороток крови 20 пациентов в контрольных образцах и после воздействия на них пяти режимов. Сняты 620 микрофотографий в частично-темном поле и в обычном свете при разных увеличениях стереомикроскопа MZ12 фирмы "Leica" (x10 – x80).

# EVALUATION RESULTS

DeVita devices' efficiency based upon blood serum at  
Moscow Regional Research and Clinical Institute n.a. M.F. Vladimirsky (MONIKI)

Оценка изменений структуры сыворотки крови проводилась по динамике трех морфологических маркеров: хронической интоксикации, воспаления и активации микроциркуляторного русла.

Установлено, что системная организация сыворотки крови всех пациентов проявляла отклик на действие внешнего волнового источника. При этом, структуры сыворотки крови большинства пациентов демонстрировали определённую динамику маркеров после воздействия соответствующего режима:

- 1) морфологические признаки интоксикации при использовании режимов 1, 3, 4 и 5 исчезали или их проявление значительно снижалось;
- 2) маркер активации микроциркуляторного русла статистически значимо выявлялся при воздействии на сыворотку крови режимов 2 и 5;
- 3) маркер воспаления в качестве ответной реакции сыворотки крови на воздействие наиболее четко выявлялся после воздействия режима 5.

Таким образом, волновое электромагнитное воздействие в пяти режимах на сыворотку крови человека показало соответствие изменения структуры сыворотки крови заданному терапевтическому назначению определённого волнового спектра прибора.

#### **Заключение:**

1. Аппарат «DeVita RITM, DeVita AP, DeVita ENERGY» оказывает отчетливое влияние на структуру сыворотки крови (по результатам анализа фаций);
2. Характер структурных изменений сыворотки крови соответствует заданным терапевтическим режимам настройки аппарата.

## BUSINESS WITH DEHOLDING

---

Roman Aleksandrovych Novikov

President of Deta Elis Holding  
Founder of Deta Elis Holding

Founder of DEHolding devoted more than 20 years to independent development in the business sector. Business mentor, expert in network sales technologies, specialist in the field of brand promotion in international markets. His main activity in the company is brand promotion around the world, organization of business teams, management and inspiration of people for super results. Under his leadership, Deta-Elis Holding is developing in new markets around the world.

Vasileios Palaiologou

Global Business and Training Director  
of DEHolding  
Director of Deta Elis Cyprus  
Director of Deta Elis Europa GmbH

Specialist in the development of large international innovative companies. Dedicated more than 26 years to business development. Expert in creating and spreading brands. Holder of various credentials of one of the leading networkers in Europe. Specialist in innovative and complex approach to health restoration. Under his leadership, DEHolding's operations have expanded to more than 20 countries around the world. Graduate in Business Administration and Marketing from Columbia University in Los Angeles, with extensive practical experience in sales management in the US market.

---

## ABOUT BUSINESS

---

Business with DEHolding is the contribution not only to your own well-being but also to human health improvement in general.

Extraordinary marketing plan developed by our experts will enable to quickly and effectively compensate the investments even having no experience in sales.

From the very moment of entering into the business, new partners get strong support from our sponsors and business-trainers. Unique educational content, innovative business approach, public informational workshops provide unbounded business development not only in Russia but worldwide.

Health improvement and rejuvenation are not only the most effective but also the most profitable business stream. Join our business movement aimed at achieving active longevity and improve the quality of your life!

The device operation technologies have been developed for 27 years on the basis of electromagnetic research by R. Voll, F. Morell, V. Ludwig, and other scientists who studied the nature of bioresonance and quantum radiation.

The main goal of the company is to improve the quality of life of people and provide them with active longevity through innovative developments.
