LIST OF DEVITA AP MANUAL PROGRAMS

Nº	The name of the program	Program description
1	No staphylococcus	<p>According to statistics, 20% of the population are carriers of staphylococci. Staphylococci are common pathogens causing infections of the skin, soft tissue, upper respiratory tract and musculoskeletal system. Common sources of infection are hospitals and doctors who become bacteria carriers, as well as people taking antibiotics. Staphylococci cause secondary infections to influenza and wound infections, post-operative suppuration and food poisoning. The program eliminates the cause of the infection, which can have a harmful effect on the human body. It is also effective as part of a comprehensive treatment for diseases caused by these bacteria.</p> <p>Application: Daily for up to 2 weeks, depending on how quickly the symptoms of infection subside.</p>
2	No streptococcus	<p>Streptococci are a widespread group of bacteria that can cause various diseases. They colonize the skin, respiratory tract and intestines of humans and can lead to acute inflammations in the ENT area, urogenital tract, abdominal organs, skin and soft tissue. Streptococcal infections are more severe than staphylococcal infections and can lead to joint, heart and kidney diseases as well as maxillary sinusitis, etc. The program is effective both in a complex and as a single program against otitis, tonsillitis and maxillary sinusitis.</p> <p>Application: Daily for up to 2 weeks, depending on how quickly the symptoms of infection subside.</p>
3	No chlamydia	<p>Chlamydia is one of the most common sexually transmitted infections. Chlamydiosis very often occurs without or with mild symptoms. It primarily affects the urogenital tract. Women are more susceptible to this infection, and children can be infected when passing through the birth canal. Chlamydiosis can cause serious complications. Therefore, it is very important to take preventive measures in time, pay attention to personal hygiene and use DeVita technologies.</p> <p>Application: Daily for 2-3 months.</p>
4	No helicobacter	<p>Helicobacter pylori is a chronic pathogen living in the human stomach and duodenum that can cause various dangerous diseases such as gastritis, stomach ulcers and hepatitis. According to the WHO, 60% of the world's population is infected with H. pylori. The infection is easily transmitted and is often considered a family disease, as if a family member is infected, there is a 95% chance that it will be passed on within the family. It is usually transmitted through the sharing of personal hygiene items and dishes and through kissing. This bacterium can also cause symptoms such as acid reflux, flatulence, stomach pain and a feeling of fullness.</p> <p>Application: Daily for 2 weeks.</p>
5	No bacteria	<p>Many diseases are caused by bacteria. The most important feature of diseases caused by bacteria is the production of bacterial toxins, which cause inflammation and poisoning and attack the internal organs. The "No bacteria" program is used to alleviate the symptoms of intoxication and improve the general condition in case of bacterial infection of the digestive and respiratory tract caused by pneumococci, listeria, klebsiella, etc.</p> <p>Use: Daily until the symptoms disappear.</p>
6	No hepatitis A	<p>In developing countries and areas with poor hygiene, there is an increased risk of contracting hepatitis A infection as the virus is transmitted through dirty hands, food and water, including seawater. If you are planning a trip to Asia or Africa, please observe the following safety measures: Pay attention to your personal hygiene, drink only bottled water and use the "No hepatitis A" program if you suspect an infection.</p> <p>Application: Daily up to 2-3 times a day for at least one month.</p>
7	Without toxins	<p>The program detoxifies the body, improves drainage function and consequently increases immunity and vitality. It is used as a detox program after the antiparasitic programs but also as a single program for one month. Unlike other detox programs, this program does not use up the body's own energy reserves.</p> <p>Application: Once a day after the antiparasitic programs. It is part of most auto-programs.</p>

8	No herpes zoster	<p>Herpes zoster (shingles) is caused by the varicella-zoster virus - the same virus that causes chickenpox. After a person has had chickenpox, the virus remains in a dormant state in certain nerve cells. Years later, it may reactivate as shingles, triggered by hypothermia, a cold or chronic illness: after an initial period of burning, tingling, itching, or stinging in the affected area, the characteristic rash appears in a stripe or band-like pattern along a nerve path, affecting one side of the body. The program aims to inactivate the virus and alleviate the main symptoms.</p> <p>Application: Daily up to 3-4 times a day until the undesirable symptoms disappear. Use for at least one month in combination with the "No herpes" program.</p> <p>Important: Do not use for chickenpox.</p>
9	No herpes simplex	<p>Herpes simplex has been known since ancient times. It is estimated that every third person has the herpes simplex virus in their body. It appears on the mucous membranes of the lips, mouth and genitals. If the immune system is weakened by hypothermia or overheating, an infectious disease or during menstruation, this can cause a rash on the mucous membranes. The virus is usually transmitted through contact with bodily secretions (blood, saliva, semen, vaginal secretions) of an infected person. The program effectively reduces the stress caused by herpes and fights off the formation of cold sores on the mucous membranes.</p> <p>Application: At the first signs of a rash, use every three hours and then 1-2 times a day for one month in combination with the "No herpes" program.</p>
10	No herpes	<p>Over 90% of the world's population are carriers of the herpes virus. The virus is transmitted in various ways, including through saliva, sexual intercourse, hygiene items and droplet infection. In the beginning, the disease can be asymptomatic, then characteristic symptoms appear: headache, general malaise, fever and skin rash. The program helps reduce recovery time and relieve pain and inflammation.</p> <p>Application: Use 1-2 times a day for one month together with the "No herpes zoster" or "No herpes simplex" program.</p>
11	Healthy lymph	<p>Lymph is a clear fluid that circulates through our tissues to cleanse them. It plays a major role in maintaining the water balance and homeostasis of the cellular microenvironment and is able to eliminate pathogenic microorganisms and toxins from the tissues. If the lymph flow is disturbed, the lymph cannot fulfill its main function, which leads to pathological processes. The program promotes the regulation of lymphatic drainage, the strengthening of lymphatic vessels and improves the condition of the lymph nodes, which leads to a reduction in swelling and better removal of metabolic waste products.</p> <p>The use of the program strengthens the body's immune system.</p> <p>Application: If necessary, use once a day or according to the schemes of the complexes. It is part of the automatic program "Cleansing-automatic".</p>
12	Anti-Cold	<p>The common cold is one of the most widespread infectious diseases in the world. The causative agents are respiratory viruses (adenoviruses, respiratory syncytial virus) that affect the upper respiratory tract (nose, pharynx, trachea, larynx). Diseases caused by this group of viruses are contagious, because they are transmitted by airborne droplets and are not treated with antibiotics. Complications from a cold may include rhinitis, sinusitis, otitis media, etc. Very often, the weakening of the immune system can lead to the development of a bacterial infection. Therefore, it is advisable to use this program in combination with the antibacterial programs "No Staphylococcus", "No Streptococcus". The program is aimed at reducing inflammation of the mucous membranes of the nose, throat, bronchi, and activation of local immunity.</p> <p>Application: at the first sign of a cold, the first 3 days - up to 2-3 times a day. Then 1 time per day for 7-14 days.</p>
13	No mould & fungi	<p>Fungi can be found everywhere. In the soil, in the air, in our bodies. In modern apartments and houses with heating systems, moisture can lead to mold growth. Popular ecological niches for mold are bathrooms, libraries and poorly ventilated living spaces. Fungi can enter the body through food, water, air and old dusty things. Molds cause inhalation allergies, as well as cross-reactions that manifest themselves on the skin. Molds can penetrate through the skin barrier wherever you take a steam bath, walk barefoot and there are suitable conditions for mold growth (moisture, high temperatures, organic residues such as dirt or sebum). Mold and other forms of fungi cause diseases of the respiratory tract, digestive tract and skin. To prevent fungal infections and reduce allergic reactions, we recommend using the "No mould & fungi" program. The program is effective against black mould.</p> <p>Application: 1-3 times a day for 4 weeks. To treat skin and nail fungal infections use it together with the "No fungi" program.</p>

14	No candida	<p>The program protects you from infection with the common fungus <i>Candida</i>. It colonizes the normal intestinal, vaginal and oral flora. However, if the immune system is weakened, the <i>Candida</i> fungus multiplies actively and damages the body. Diseases can be also caused by pathogenic <i>Candida</i> fungi that are transmitted through food, household items, after taking strong antibiotics or by sexual intercourse with an infected person. The symptoms are an allergic skin rash, vaginal mycosis, itching in the genitals and dysbiosis. You can prevent the proliferation of <i>Candida</i> by using the "No candida" program.</p> <p>Application: The program is used 1-3 times a day for 2-4 weeks together with the "No protozoans" program.</p>
15	No fungi	<p>Fungal diseases in humans are infectious diseases caused by pathogenic fungi. The greatest danger of a fungal disease is that the affected areas are often an entry point for many other infectious agents. Fungi most frequently infect the skin and its appendages (hair, nails) and the mucous membranes of the internal organs. Treatment requires a comprehensive approach and personal hygiene. The program actively combats fungi such as <i>Trichophyton</i>, <i>Microsporum</i> and <i>Mucor</i>.</p> <p>Application: To prevent fungal infections, it is advisable to apply the program every time after visiting a sauna, swimming pool or beach and after contact with an infected person. In the case of an existing fungal infection, the program is applied 1-2 times a day for one month.</p>
16	No protozoans	<p>The program protects you from the negative impact of most protozoa, which infect one in five people. Protozoa are transmitted through dirty hands, contaminated water or food. An infected person suffers from severe abdominal pain, bloating, constant fatigue and depression. The liver and pancreas can also be affected. Certainly, these symptoms make life difficult for us. There is also a risk of infecting your relatives. The program affects amoebae and giardia and kills them. Follow hygiene rules and the golden rule, which is "don't drink tap water", and use the "No protozoans" program regularly as a preventive measure to protect yourself from these microorganisms.</p> <p>Application: 1-2 times a day for 10-14 days. In case of re-infection, the sources of infection should be determined.</p>
17	Intimate health	<p>There are many pathogens that cause diseases of the urogenital tract. These diseases are often caused by not just one, but several pathogenic microorganisms. The infections can be acute or chronic. Over time, a chronic infection can cause narrowing of the urethra, joint inflammation and infertility, and increase the risk of an ectopic pregnancy. Sometimes an exacerbation can occur during a cold or during psychological stress. Infections are usually transmitted via sexual intercourse and sometimes during childbirth from an infected mother. Bacteria such as ureaplasma can colonize the body asymptotically for years and go unnoticed. A key protective factor of intimate health is optimal microflora, and today's DeVita technologies work to kill pathogenic microflora and support the body's immune defenses. The program effectively combats parasites and pathogens such as <i>Ureaplasma</i>, <i>Toxoplasma</i> and <i>Mycoplasma</i>.</p> <p>Application: Daily for a month.</p>
18	No schistosomes (blood-flukes) & trematods	<p>Trematodes (flukes) are flatworms that can cause serious illness in humans. They infect the blood (schistosomes), liver, intestines and lungs. The infection is transmitted by chewing on blades of grass, especially near bodies of water or when swimming in them, by eating raw salad or vegetables and by eating undercooked fish and red meat. The program aims to remove most types of flukes, including schistosomes, regardless of their developmental stage and location in the body.</p> <p>Application: Daily for 14 days.</p>

19	No nematodes and ascarides	<p>The worm eggs, which are invisible to the naked eye, enter the human mouth through undercooked meat, unwashed fruit and dirty hands. The worms living in the host's body feed on its tissue, deprive it of nutrients (causing excessive hunger) and release toxins. An infected person loses weight, may suffer from hair loss and dandruff. The most common helminths are roundworms (ascarids), which can cause injury to the wall of the small intestine, intestinal obstruction, peritonitis, bronchitis, bronchial pneumonia, coughing up blood, as well as liver and pancreatic diseases. Ascariasis triggers an allergic reaction that manifests itself as a skin rash and bronchial asthma. The application of the program prevents the roundworms from feeding, which leads to their death and natural elimination from the digestive tract. The program has no toxic side effects. It is recommended that pet owners, parents of infants, animal keepers and anyone whose job involves dealing with animals follow the preventive measures once a quarter.</p> <p>Application: The program is used daily for 7-10 days. At least 10 sessions in total. The cycle should be repeated after 14 days.</p>
20	No parasites, General	<p>Parasites can enter the body through the skin as well as through food, water and dust. Even with a healthy lifestyle, parasites cause health problems. A healthy diet, exercise and hardening of the body do not bring significant positive results without ridding the body of parasites. Parasites are the cause of many chronic diseases, such as gallbladder inflammation, gallstone disease, pancreatitis, colitis, diabetes, bronchial asthma and dermatitis. Symptoms such as irritability, anxiety, chronic fatigue, appetite disorders, anaemia, hyperactivity in children, headaches, problem skin, brittle nails and hair and immunodeficiency can be signs of parasite infections. Parasitic diseases are dangerous because they disguise themselves as other diseases. The prevention of parasitic diseases consists primarily of following hygiene rules and applying the "No parasites, General" program. These measures serve to maintain your health and the health of those around you.</p> <p>Application: use the program daily for 7-10 days. At least 10 sessions in total. Repeat the course of treatment after 14 days.</p>
21	No parasites, Digestive tract	<p>Parasites in the gastrointestinal tract and liver cause biliary dyskinesia, cholangitis, gallbladder inflammation and hepatitis. In the intestine, they cause inflammation of the small intestinal wall and a reduction in nutrient absorption. Toxins released by parasites cause joint and muscle pain, affect the central nervous system and trigger depressive states, restlessness, nervousness and sleep disorders. The program aims to rid the body of parasites in the gastrointestinal tract, liver and pancreas.</p> <p>Application: The program is to be used daily for 7-10 days. The course should be repeated after 14 days.</p>
22	Anti-Flu	<p>Influenza is an acute viral infection that affects people of any age. Up to 500 million people get the flu every year. Severe influenza can cause irreversible damage to the cardiovascular system, respiratory tract, and central nervous system. The virus is transmitted very easily by airborne droplets (by sneezing, coughing, talking). The most common complication of influenza is pneumonia. The program is aimed at eliminating various strains of influenza viruses and alleviating inflammatory manifestations.</p> <p>Application: to prevent influenza during an epidemic, the program is to be used once every 2 days. If necessary - daily up to 2-3 times a day, alternating it with the "Against flu-General" program. After that it is necessary to use the "Drainage-General" program. It can be used together with the programs "No staphylococcus", "No streptococcus", "No candida" in order to avoid bacterial and fungal burden, as well as the programs "Antivirus", "Anti-Cold".</p>
23	Against flu - General	<p>Influenza is a disease that affects the upper and lower respiratory tract, causes significant intoxication and can lead to serious complications. Influenza always starts acutely and quickly (the first symptoms appear within 48 hours of infection). The main symptom is fever (40 °C and higher). It can last up to 5 days and be accompanied by shortness of breath, breathing difficulties, impaired consciousness and seizures. In people with a weakened immune system, the elderly and children, such temperatures can cause toxic shock syndrome (a condition causing vital organs to fail). If you use the program "Against flu-General", you can improve your condition (in case of illness), as well as restore your health quite quickly and without complications when using several programs against influenza viruses in combination.</p> <p>Application: At the first signs of flu and elevated body temperature, use 1-3 times in a row or alternating with the "Anti-Flu" program. Be sure to drink plenty of fluids and maintain good personal hygiene.</p>

24	Healthy gastrointestinal	<p>Gastrointestinal infections can be caused by pathogens like bacteria, viruses, or parasites entering the body and causing inflammation. People of all ages can be affected, most often children and those who take antibiotics. Gastrointestinal infections are accompanied by nausea, vomiting, diarrhea, abdominal pain, fever. Symptoms of viral infections also include: runny nose and redness of the throat, as well as pain by swallowing, lack of appetite, loss of strength. The program is aimed at eliminating rotavirus, which causes gastroenteritis, and pathogenic Escherichia coli strains, normalizes well-being and prevents dehydration, which is harmful to our body.</p> <p>Application: On the first day, use 4-5 times in a row to achieve a lasting result. Then use 1-2 times a day for 3-5 days, alternating with the "Drainage-General" and "Antivirus" programs. Make sure to drink plenty of fluids.</p>
25	Help against poisoning	<p>When enterobacteria or enteroviruses enter the body with food, water, or through the mucous membranes of the respiratory tract, an infection develops, which is commonly referred to as poisoning. This infection can be latent or show symptoms of its presence: headache, muscle pain, abdominal pain, fever, vomiting, stool disorder. Eventually it can lead to serious organ damage. The program helps the body cope with infection caused by enteroviruses and some types of salmonella, accelerating the recovery process, and reducing the likelihood of complications.</p> <p>Application: Use it 4-5 times in a row on the first day to achieve sustainable results. Then use it 1-2 times daily for 3-5 days, alternating with the program "Drainage-General" and "Antivirus". Be sure to drink as much water as possible.</p>
26	Antivirus	<p>Viral infections are a large group of diseases caused by viruses. Viruses are connecting links between living and nonliving organisms. Since viruses have genetic material, but do not have their own cell, they are only intracellular parasites. They are difficult to destroy because they replicate inside host cells. Viruses can be transmitted by airborne droplets, through various objects, kissing and sexual intercourse. Our immunity plays a large role in destroying viruses in the body. The Antivirus program is aimed at combating various viruses, and in particular the cytomegalovirus and Epstein-Barr virus. It is also used to attenuate viruses and enhance the body's immunity.</p> <p>Application: daily for a month.</p>
27	Drainage, General	<p>It is one of the basic detoxification programs. The lymphatic system is responsible for detoxification and lymphatic drainage. During an illness, the level of toxins in the body rises significantly. The lymphatic system is unable to eliminate them all, which can lead to intoxication. In addition, the natural drainage of wound fluid can be disrupted as a result of an illness or injury. The accumulation of fluid containing pathogenic microbes can cause severe inflammation and worsen the patient's condition. By using the "Drainage - General" program, you protect your body from the toxic load that often occurs as a result of various diseases and injuries. The program is aimed at neutralizing toxins and detoxification without stressing the lymphatic system.</p> <p>Application: Once after using one of the DeVita AP programs. It is part of the automatic program "Cleansing-automatic".</p>
28	Drainage Antitox	<p>The extracellular matrix is the main area where toxins accumulate, leading to metabolic disorders, to the development of many serious chronic diseases and to premature ageing. Tissue drainage is a means of detoxifying the tissues. It helps remove salts of heavy metals and radionuclides from the body, improves metabolic processes and the general condition of the body.</p> <p>Application: In case of severe poisoning use daily together with the program "Drainage-General".</p>
29	Mexican detoxification	<p>A method for deep and complete detoxification of the human body proposed by Dr. R. Rife. The program helps eliminate metabolic waste and toxins, improve the drainage function of the lymphatic system, increase the detoxification capacity of the liver, stimulate the excretory function of the kidneys and strengthen the immune system.</p> <p>Application: Daily for one month, provided there are no serious diseases of the liver, kidneys or lymphatic system. If you do have such diseases, it is recommended to use the automatic program "Complete cleansing-automatic" on DeVita Ritm to perform a gentle detoxification of the body.</p>

30	No allergies	<p>An allergy is a hypersensitivity reaction of the immune system to certain substances: food, wool, dust, pollen, chemical substances and infectious agents. Today, over 85% of the world's population suffers from various allergies. The most common causes of allergies are a poor diet and an unhealthy lifestyle. The symptoms of allergies are a sudden runny nose, sneezing or tearing, redness and itching of the skin. The program alleviates the main symptoms of an allergy, improves general well-being and helps stabilize the immune system.</p> <p>Application: Daily, if indicated and to alleviate the condition.</p>
31	Weight Control	<p>The program aims to combat adenovirus 36, which often causes obesity. It also regulates the autonomic nervous system and accelerates weight loss. The program also supports the body's energy reserves.</p> <p>Application: It is recommended to use the program according to the "Body figure" complex.</p>
32	Without Salmonella	<p>The genus Salmonella is a member of the family Enterobacteriaceae. Salmonellae are resistant to the environment: they can survive in household dust, in open water, in frozen meat and sausage products, poultry eggs, dairy products from 3 to 6 months. They are killed at temperatures of 70 degrees Celsius and above. Infection is accompanied by: high fever, abdominal pain, vomiting, liquid stools. However, carriers may have no symptoms.</p> <p>Application: Daily for 2 weeks.</p>
33	Without Yersinia	<p>Yersinia is an enterobacterium that causes inflammation in the small intestine, but can also affect other organs such as the liver, kidneys, heart and joints. Yersinia species are found in soil, water and food. They can tolerate low temperatures, allowing them to survive and multiply for a long time in the refrigerator. They can remain in the human body until the immune system is weakened, without triggering any inflammation. After that, an exacerbation begins.</p> <p>Application: Daily for two weeks.</p>
34	Without Proteus	<p>Bacteria of the genus Proteus are part of the normal human intestinal flora and facultative human pathogens. As they multiply, they cause damage to the digestive tract organs and the urinary tract, birth defects and wound infections. The pathogenicity of this bacterium manifests itself in case of uncontrolled intake of antibiotics, or when bacteria enter from the outside through food, water or unwashed hands.</p> <p>Application: Daily for two weeks.</p>
35	Without Klebsiella	<p>Klebsiella is part of the natural intestinal flora and a facultative pathogenic bacterium. In elderly and immunocompromised people, it can attack the organs of the digestive tract, the respiratory tract and the urogenital tract, causing e.g. purulent pneumonia or a urinary tract infection. This can lead to severe intoxication and consequently to functional disorders of the affected organs. Klebsiella can be transmitted through food, water and contact with infected people.</p> <p>Application: Daily for two weeks.</p>
36	Without Campylobacter	<p>Campylobacter bacteria are a common cause of intestinal infections. They penetrate the mucous membranes and lymphatic vessels of the intestine and other organs. The infection is transmitted through livestock, poultry, consumption of contaminated meat, milk or water, less frequently through damaged skin and bites from infected animals, also transplacental or during childbirth. People at risk are rural residents, livestock and poultry farm workers, as well as tourists visiting developing countries.</p> <p>Application: Daily for two weeks.</p>
37	Without Clostridia	<p>Clostridium difficile is part of the normal intestinal microbiota in 1–3% of healthy adults and 15–20% of infants. In cases of dysbiosis, it can cause damage to the walls of the large intestine. Clostridium botulinum is widespread in the soil and seawater; it produces one of the most potent bacterial toxins known, botulinum toxin.</p> <p>Application: Daily for 2 weeks.</p>
38	Without Shigella	<p>Shigella is the causative agent of bacillary dysentery and a leading cause of bacterial diarrhea worldwide. Infection can occur through fecal-oral route, contaminated surfaces, water and food. It can also be transmitted by flies and cockroaches.</p> <p>Application: daily for 2 weeks.</p>
39	Without Rotavirus	<p>Rotavirus (often called "stomach flu") multiplies in the cells of the gastrointestinal mucosa, causing severe diarrhea and dehydration. It is usually transmitted through food.</p> <p>Application: Daily for 2 weeks.</p>

40	Anti-virus Gastrointestinal	Enterovirus and Coxsackie virus are enteroviruses that affect the central nervous system, muscles, heart, skin, respiratory system and the urogenital tract. They are transmitted by droplet and contact infection. Waves of infection rise in warm seasons. Application: Daily for two weeks.
41	Without Trematodes - General 1	Trematodes are parasitic flatworms commonly known as flukes. They infest the liver, pancreas, intestines, lungs, blood vessels and brain. The paths of infection are: swimming in natural waters in Asian, African and South American countries and eating raw or undercooked fish, shellfish, mussels and meat. Application: Use the two programs (Without Trematodes - General 1 and 2) in combination daily for two weeks.
42	Without Trematodes - General 2	
43	Stop Amoeba	Entamoeba histolytica is a protozoan parasite. It is the causative agent of amoebic dysentery and can infect and damage the large intestine, liver, lungs and other organs. It enters the body through contaminated food or water. Application: Daily for two weeks.
44	Without Enterococcus	Enterococci colonize the human intestine. When taking antibiotics, when the protective function of the skin and mucous membranes is impaired, in serious illnesses or in older people, enterococci can cause various disorders in the small intestine, urinary tract, heart, vagina, liver and skin. Application: Daily for 2 weeks.
45	Without nematodes and ascarididae - New	The program is aimed at fighting parasitic roundworms. It includes most nematode species that infect the human and animal body. Application: Daily for 2 weeks.
46	Stop Adenovirus - General	Adenoviruses are a group of viruses that cause acute infectious diseases affecting respiratory organs, eyes, and lymph nodes. These viruses are usually transmitted by droplet infection during the cold season. Application: Daily for 2 weeks.
47	Stop Coronavirus	The virus is widespread in Europe, Asia, and North America. It is transmitted by airborne droplets and causes damage to the respiratory tract, even to the point of destruction of pulmonary alveoli. Application: Daily for 2 weeks.
48	Stop Penicillium	Penicillium is a genus of mold that infects the organs of the urogenital and respiratory systems, the lymph nodes and the skin and causes severe intoxication and allergies. Application: Daily for two weeks.
49	Without Rickettsia	Rickettsia is an intracellular parasite. It can infect any organ of the body, causing significant CNS disorders and circulatory problems. Rickettsia causes diseases like typhus and Rocky Mountain spotted fever. It can be transmitted through a tick bite, food and direct contact, and is widespread in developing countries. Application: daily for 2 weeks.
50	Without Papilloma - General	Human papilloma viruses infect the skin and mucous membranes and cause warts. Some of them can lead to malignant tumors, with women being particularly at risk. HPV can be transmitted through direct contact, during sexual intercourse and at birth from mother to baby. Application: Daily for 2 weeks.
51	Without Papilloma	When HPV infects the mucous membranes of the urinary tract, formations occur in the renal pelvis and bladder. With prolonged exposure to unfavorable factors, these formations can not only reduce the functionality of the organs, but are also able to degenerate. Application: Daily for 2 weeks.

52	Without Trichomonas	Trichomonas is a protozoan parasite that infects the urogenital tract and causes trichomoniasis, a common sexually transmitted infection. The infection is almost always transmitted by unprotected sexual contact with an infected person, less frequently through contact with the toilet seat, in the swimming pool, by sharing towels, washcloths, hygiene items or by putting on other people's clothing (underwear). Once the pathogen enters the bloodstream, it can disguise itself as blood cells. The greatest danger does not usually come from the protozoa themselves, but from the pathogens they transmit: chlamydia, candida, gonococci, cytomegalovirus and herpes viruses. Application: Daily for two weeks.
53	Without Leptospira	Leptospira is a bacterium that can cause damage to capillaries, liver, kidneys, and muscles. It is spread worldwide. It can be transmitted through domestic and wild animals, through damaged mucous membranes and skin, and from natural water sources. Application: Daily for 2 weeks.
54	Without Cryptococcus	Cryptococcus is a yeast-like fungus. It can infect the central nervous system, lungs, skin and mucous membranes. The pathogen is often found in soil contaminated with bird droppings. It is transmitted by airborne infection. Application: Daily for 2 weeks.
55	Without Toxoplasma	The worldwide spread of Toxoplasma infection is very high, at about 90%. The pathogen usually remains in the body without any symptoms. It can be transmitted via the placenta or acquired in other ways. Toxoplasma infects the nervous system, eyes, heart, muscles, lungs, intestines and skin. Application: Daily for 2 weeks.
56	Without Ureaplasma	Ureaplasma are facultative pathogenic bacteria that cause diseases of the urogenital tract and joints as well as pathologies of pregnancy and the foetus. They can be transmitted sexually or during pregnancy or childbirth. Application: Daily for 2 weeks.
57	Without Echinococcus	A major problem are the larvae of the tapeworm, which usually form cysts. These cysts press on the surrounding tissue, leading to atrophy and necrosis. The larvae invade the liver, lungs, kidneys, bones and brain. Infection occurs through contact with infected animals, picking berries and herbs and drinking contaminated water. Butchers, shepherds and tanners are also at particular risk. Application: Daily for 2 weeks.
58	Without Pseudomonas aeruginosa	Pseudomonas aeruginosa is a multidrug-resistant, opportunistic pathogen. It infects the digestive tract, the respiratory system, the central nervous system, and other organs and systems. Sources of infection are humans and animals. Transmission routes: droplet infection, food infection, contact infection. Application: Daily for 2 weeks.
59	Against Lyme Disease 1	Lyme disease is the most common disease that can be transmitted through the bite of an infected blacklegged (Ixodes) tick. It affects the central nervous system, the heart and the joints. Application: After a bite, use the program daily for 2 weeks in combination with the program "Against Lyme Disease 2". For symptoms caused by previous bites, see the "Lyme Disease" complex.
60	Against Lyme Disease 2	The tick-borne encephalitis virus is transmitted through the bite of an infected tick and, more rarely, through the consumption of raw milk from an infected cow or goat. The endemic areas are: Siberia, Russian Far East, the Urals. The central nervous system is most affected. Application: After a bite, use the program daily for 2 weeks in combination with the program "Against Lyme Disease 1". For symptoms caused by previous bites, see the "Lyme Disease" complex.
61	Healthy Cell - 1	Numerous pathogenic factors lead to the accumulation of toxins in the body, which can cause cell degeneration. The programs "Healthy Cell - 1" and "Healthy Cell - 2" reduce the risk of cancer, help regulate tissue changes, inhibit inflammation and strengthen the immune system. Application: The programs "Healthy Cell - 1" and "Healthy Cell - 2" can be combined; see the complex "Healthy Cell".
62	Healthy Cell - 2	

63	Healthy Gums	<p>Gum disease (gingivitis) is caused by viruses, bacteria, and fungi. At risk may be people wearing dentures and braces. The program helps to reduce the pathogenic load, reduce the inflammatory process, and improve trophic tissue Gum inflammation (gingivitis) is caused by viruses, bacteria and fungi. People with dentures and braces are particularly at risk. The program helps reduce the pathogenic load, inhibit inflammation and improve tissue trophicity.</p> <p>Application: Daily for 1-2 months.</p>
64	Mucous Membrane Regeneration	<p>The formation of aphthous ulcers on the oral mucosa indicates inflammation, which can be triggered by viruses, bacteria, injuries or mineral deficiencies. The program inhibits inflammation, serves to restore the oral mucosa and strengthens local immunity.</p> <p>Application: This program is to be used daily for 2 weeks together with the "Healthy Mouth" program.</p>
65	Healthy Mouth	<p>Inflammation of the oral mucosa (stomatitis) is caused by pathogens, injuries to the oral cavity, dental procedures and an unbalanced diet. Stomatitis can involve the tongue, the palate and the mucous membrane of the cheeks and lips. The program inhibits inflammation, restores the oral mucosa and strengthens local immunity.</p> <p>Application: Daily for 2 weeks. It can be combined with the program "Mucous Membrane Regeneration" and should be used after any dental procedures that involve damage to the oral mucosa.</p>
66	Without Fistula	<p>Pus in the gums is very often accompanied by the formation of a fistula. This can have serious consequences, from tooth loss to inflammation of the deep tissue. The program helps prevent the formation of pus and reduce inflammation.</p> <p>Application: Daily for 2-4 weeks. It should be used immediately after dental procedures such as extraction, implantation or treatment.</p>
67	Stop Injury (teeth)	<p>The program relieves pain, accelerates the healing process and reduces swelling.</p> <p>Application: Daily for 1-2 weeks. It should be used immediately after dental procedures such as extraction, implantation or treatment.</p>
68	CNS Without Problems	<p>The program helps improve the function of the nervous system after exposure to various stresses (infections, trauma, etc.). It promotes the restoration of nerve connections between the central nervous system and the periphery, relieves swelling and pain.</p> <p>Application: Daily for 1-6 months. Preferably in combination with the "Healthy Nerves" program (see the "Lyme Disease" complex).</p>
69	Healthy Nerves	<p>Injury to the nerve fibers can lead to functional disorders of the nervous system. The program prevents the destruction of the myelin sheath of nerve fibers, thereby preserving their conductivity.</p> <p>Application: Daily for 1-6 months. Preferably in combination with the program "CNS without problems" (see the complex "Lyme Disease").</p>
70	Clean Sinuses	<p>Sinusitis is an inflammation of the mucosal lining of one or more paranasal sinuses, which can occur as a result of infectious diseases of the nose and respiratory tract as well as after injuries to the facial area. The program helps reduce inflammation in the sinus area, improve mucus drainage and relieve pain in acute conditions.</p> <p>Application: Daily for 2 weeks.</p>
71	Clean Sinuses - General	<p>The biggest problem for many people is chronic sinusitis, which may have no obvious symptoms but persists over a long period of time. The causes can be upper respiratory tract infections, polyps, deviated septum or decayed teeth. The program helps inhibit inflammation in the sinus area, reduce swelling and prevent exacerbations.</p> <p>Application: Daily for one month if the problem is already present or to prevent an exacerbation during the cold season</p>
72	Ears Without Inflammation	<p>Ear inflammation can be caused by pathological processes in the nasopharynx, a deviated nasal septum, or ear injuries. The program helps reduce swelling, inflammation and pain.</p> <p>Application: Daily for 2 weeks. Alternate with the DeVita Ritm program "Healthy Ears".</p>

73	Throat Without Pain	Inflammation of the pharyngeal tonsils (Tonsillitis) often occurs after a sore throat or other infectious diseases of the pharynx. It can be acute or chronic. The infection can be transmitted externally by airborne droplets or internally from a chronic internal infection. The program helps reduce tonsil inflammation, swelling, pain and toxic load. Application: Daily for 2 weeks. Alternate with the DeVita Ritm program "Throat Without Problems".
74	Against Cold - General	Inflammation of the nasal and pharyngeal mucosa (rhinopharyngitis) is usually caused by viruses and bacteria. The highest incidence of illness is observed between seasons. The program relieves inflammation and swelling, and prevents exacerbations. Application: Daily for 2 weeks.
75	Anti-inflammation - General	Inflammation is the body's response to injury or exposure to a pathogenic agent. The program helps the body to eliminate the source of inflammation, regardless of its location, to reduce the influence of pathogenic factors, and to restore homeostasis. Application: DDaily for 1-4 weeks. It is advisable to combine this program with any other programs in order to reduce inflammation.
76	Stop Migraine	Migraine is one of the most common types of headache. Symptoms include severe, often pulsating and throbbing pain, which can be limited to one side of the head and is aggravated by movement, light or noise. The program relieves vascular spasms, alleviates pain and promotes blood circulation in the head. Application: As needed.
77	Antiseptic	Skin injuries such as scratches, cuts and burns are entry points for pathogens. As a result, the wounds may take a long time to heal, become inflamed and cause pain. The program helps disinfect the wound, reduce inflammation and accelerate healing. Application: Daily for 1-4 weeks. It is advisable to combine it with any other programs to reduce inflammation.
78	Healthy Bile	Poor and irregular diet (prolonged fasting, alcohol, snack and spice consumption, too spicy, fatty and fried food, avoidance of vegetable oil), stress, low fluid intake and infectious diseases of the liver are the causes of gallbladder disorders. The program promotes the flow of bile, helps restore gallbladder function and relieves pain. Application: Daily for 1-6 months, preferably in the evening. Alternatively, every other day.
79	Without cough	Cough is a protective reflex reaction of the body that occurs due to irritation of the respiratory tract mucous membrane. It can be a sign of inflammation of the respiratory system, which can be caused by pathogenic viruses, bacteria, fungi and other agents, as well as allergens. The program alleviates the condition in the presence of acute or chronic cough, reduces inflammation of the mucous membrane of the respiratory tract. Application: daily for 2-4 weeks.
80	Without bacterial pneumonia	According to scientists, the first place among the causes of lower respiratory tract inflammation is occupied by microbial infections. Most bacteria that affect the respiratory system are part of the natural micro flora of the organism, but under adverse conditions they become pathogenic. The program fights against such microorganisms as: Streptococcus pneumoniae, Chlamydomphila pneumoniae, Mycoplasma pneumoniae, Klebsiella pneumoniae, etc. Application: daily for 2 weeks.
81	No Coronavirus - New	A new improved and expanded program that allows you to fight with all types of coronavirus, including new mutated forms. Application: daily for 2 weeks. In order to prevent the disease 2-3 times a week.
82	Without pneumonia	Inflammation of the lung tissue can be caused by pathogenic flora of various forms: viral, bacterial, fungal, etc. It arises not only as an independent form, but also as a result of the common cold, decreased immunity, and lack of vitamins. The program relieves from swelling and inflammation of the lower parts of the respiratory system, improves the functionality and energy of these organs, increases local immunity. Application: daily for 2-4 weeks. It is advised to combine with the program "Without cough".

83	Low back without inflammation	<p>As a result of pinched and inflamed spinal nerve roots in the lumbar and/or sacral spine, many people may experience sharp pain, often spreading into the leg. The most susceptible to the disease are persons who, due to their occupation, are forced to lift heavy weights, be in a bending position or sit for long periods of time. The program relieves pain and reduces inflammation.</p> <p>Application: daily for 2-4weeks.</p>
84	Stop acne bacteria	<p>Propionibacterium is a conditionally pathogenic flora of human skin. Under the right conditions, as a result of blockage of the sebaceous gland ducts and increased sebum production, a favorable environment is created for their reproduction inside the hair follicles with the formation of acne (inflammation of the sebaceous glands). The activation of the pathogenetic properties of Propionibacteria may be linked to sex, age, and genetics. The program fights pathogenic microflora, and reduces skin inflammation.</p> <p>Application: daily for a month, in conjunction with the "Without toxins" and "Skin without acne" programs on DeVita AP and the corresponding programs on DeVita Ritm (see Clear skin complex)</p> <p>In case of skin predisposition to acne formation, in order to prevent inflammation, it is desirable to use the program every quarter according to the above scheme.</p>
85	Without microsporium	<p>A fungus of the genus Microsporium primarily affects the skin, scalp, and hairy areas of the skin (beard, mustache), causing an infectious disease in animals and humans (ringworm). It is mainly transmitted from animals, less frequently from person to person or through household items. The program destroys pathogenic fungi, and it improves the condition of human skin.</p> <p>Application: daily for a month, in conjunction with the "Without toxins" program on DeVita AP and the corresponding programs on DeVita Ritm (see Clear skin complex).</p>
86	No onychomycosis	<p>Onychomycosis is a fungal lesion of the nails, usually caused by fungi of the genus Trichophyton, Epidermophyton floccosum and microsporidia. Men and the elderly are most likely to be affected. The development of onychomycosis provoke trauma, flat feet, varicose veins, hyperhidrosis, endocrine and immunological disorders, blood diseases, vascular pathology, prolonged use of hormonal drugs, antibiotics and cytostatics, wearing tight shoes and refusal to comply with common norms of personal hygiene. The program causes the death of pathogenic fungi, reduces inflammation, and helps restore the integrity of the skin and nails.</p> <p>Application: daily for a month, in conjunction with the "Nails without fungus", "Without trichophyton", "Without toxins" programs on DeVita AP and the corresponding programs on DeVita Ritm (see "Clean skin" complex). It is mandatory to maintain personal hygiene. To consolidate the result, it is desirable to repeat the cycle in a month. In order to prevent the occurrence of the disease - once or twice a year (fall-spring).</p>
87	Zygomycetes, stop!	<p>People with low immune defenses are most likely to get infected with these fungi. Persons at risk include long-term users of immunosuppressive medications, persons with diabetes mellitus, cancer or acquired immunodeficiency syndrome. The fungus affects internal organs, more commonly the CNS, lungs and GI tract. The program inhibits the development of fungal flora, and it improves the person's condition.</p> <p>Application: daily for a month, in conjunction with the "Without toxins" program on DeVita AP and the corresponding programs on DeVita Ritm depending on the concerned organ. To prevent infection - 2 times a year for people with the above-mentioned health problems.</p>
88	Nails without fungus	<p>Mycosis of feet and nails is an infectious disease caused by pathogenic or conditionally pathogenic fungi of the species Trichophyton, Epidermophyton, Candida, Scytalidium. Risk factors are: violation of personal hygiene; sharing shoes; visiting public baths, swimming pools, and beaches; climatic conditions; injuries; wearing tight shoes; chronic diseases, etc.</p> <p>The program is aimed at destroying pathogenic flora, reducing inflammation, restoring the condition of the skin of the feet and nails.</p> <p>Application: daily for a month, in conjunction with the "No onychomycosis", "Without trichophyton", "Without toxins" program on DeVita AP and the corresponding programs on DeVita Ritm (see Clear skin complex). It is mandatory to maintain personal hygiene. To consolidate the result, it is desirable to repeat the cycle in a month. In order to prevent the occurrence of the disease - once or twice a year (fall-spring), in case of visiting a swimming pool, bath, beach - every time after the visit.</p>

89	Without trichophyton	<p>Fungi of the genus Trichophyton affect the scalp, smooth skin and nails. Infection occurs through contact with a sick person or their belongings, as well as through contact with animals and their care items. The disease can occur in both acute and chronic forms. The program inhibits the development of fungi and inflammation.</p> <p>Application: daily for a month, in conjunction with the "Without trichophyton", "Nails without fungus", "Without toxins" programs on DeVita AP and the corresponding programs on DeVita Ritm (see "Clean skin" complex). It is mandatory to maintain personal hygiene. To consolidate the result, it is desirable to repeat the cycle in a month. In order to prevent the occurrence of the disease - once or twice a year (fall-spring).</p>
90	Mycosis fungoides	<p>Mycosis fungoides affects primarily the lymphoid-reticular system of the skin, and subsequently the internal organs. The program helps to reduce the spread of fungus into the tissues and reduce the development of inflammation.</p> <p>Application: daily, in conjunction with the "Without toxins" program on the DeVita AP and the "Healthy day" and "Health" programs on the DeVita Ritm.</p>
91	Solar keratosis	<p>The main cause of formation is due to prolonged exposure of the skin to direct sun rays, but manifests itself only with age when the immune forces are weakened. Therefore, it is most common in the elderly. Factors such as heredity, wearing tight clothing, taking certain medications, etc. can be triggers of the disease. The program helps to reduce the chances of keratosis manifestation and progression.</p> <p>Application: daily, in conjunction with DeVita Ritm programs (see "Clean skin" complex).</p>
92	Stop warts	<p>Warts are benign skin neoplasms caused by human papillomaviruses. The transmission of papillomavirus can occur through household and sexual contact. The program fights HPV, preventing them from spreading in the body and forming neoplasms. It is necessary to consult a dermatologist regarding the removal of formations from the skin.</p> <p>Application: daily for a month, in conjunction with the "Without toxins" program on DeVita AP and the programs DeVita Ritm (see Clear skin complex). Family members and sexual partners should use the program at the same time to prevent re-infection.</p>
93	Stop pimples	<p>Inflammation of hair follicles, provoked by the spread of staphylo-streptococcal infection with poor personal hygiene and/or the presence of chronic intoxication, infection, hypovitaminosis, leads to the formation of furuncles. The program inhibits the activity of bacterial flora, reduces inflammatory manifestations.</p> <p>Application: daily for a month, in conjunction with the program "Mode 2 - automatic".</p>
94	Fingers without inflammation	<p>In the presence of microtraumas and injuries to the perionychium area of the fingers or toes and the development of bacterial, most often - staphylococcal, less often - streptococcal or mixed flora in the tissues of the fingers can lead to acute purulent inflammation - paronychia. The program reduces tissue inflammation, swelling, improves overall health, and reduces the risk of complications.</p> <p>Application: daily for a month, in conjunction with the program "Mode 2 - automatic".</p>
95	No scleroderma	<p>Scleroderma is a connective tissue disease associated with impaired blood supply and subsequent thickening of tissues. The program improves blood supply to the tissues, slowing down the thickening processes.</p> <p>Application: daily for a month, in conjunction with the program DeVita Ritm. The cycle is repeated 2 times a year.</p>
96	Erysipelas, stop	<p>Erysipelas is an infectious disease affecting the skin and mucous membranes. It is transmitted by airborne droplets, sometimes by contact. Injuries and microtraumas of the skin and mucous membranes serve as entry gates for infection. The program prevents the spread of the disease, helps to reduce inflammation and intoxication.</p> <p>Application: daily, in conjunction with the "Without toxins", "No streptococcus" programs on the DeVita AP and the "Healthy day" and "Health" programs on the DeVita Ritm. The programs should be used in cycles 2-3 times a year for a month.</p>
97	Relieve psoriasis	<p>Psoriasis is a chronic non-infectious skin disease. Occurrence is associated with hereditary predisposition, immunity disorders, endocrine and nervous system disorders. The program helps reduce inflammation, prevent complications, and improve the quality of life.</p> <p>Application: daily, in conjunction with DeVita Ritm programs (see "Clean skin" complex).</p>

98	Leprosy	<p>Lepra or leprosy is a chronic infectious disease affecting mainly the skin, peripheral nerves, upper respiratory mucosa and visual organs. It is characterized by a prolonged cycle (from a year to decades) with periodic exacerbations and can be disguised as other diseases, most often skin diseases. The program is aimed at destroying bacteria - the cause of the disease, reducing the inflammatory process, and preventing complications.</p> <p>Application: in conjunction with the "Without toxins", "Restoration 2- Automatic," programs on the DeVita AP and the "Healthy day" and "Health" programs on the DeVita Ritm.</p>
99	Without Epidermophyton	<p>A genus of fungi that cause lesions (mycoses) of the skin, hair, and nails. It is the most common group of mycoses and occurs in people of all ages, sexes, occupations and health conditions. More commonly settles in the folds of the skin. The program inhibits the development of fungal flora, reduces inflammation, and improves the quality of life.</p> <p>Application: daily for a month, in conjunction with the "Without toxins" program on DeVita AP and the corresponding programs on DeVita Ritm (see Clear skin complex). It is mandatory to maintain personal hygiene.</p>
100	Restoration of blood circulation	<p>A circulatory disorder is a condition in which blood does not flow in sufficient quantities to the brain, internal organs, and extremities. The problem can lead to severe complications, hypoxia, provoke deterioration of memory, hearing, etc. Such disorders develop amid some infectious or chronic diseases. The program helps to improve blood supply to organs and tissues especially after infectious diseases.</p> <p>Application: daily for a month, in conjunction with the programs on DeVita Ritm (see Heart and blood vessels complex).</p>
101	Healthy spleen	<p>The spleen is the organ responsible for hematopoiesis, immunity, and blood supply. Being in a constant state of stress, irritability leads to problems with the functioning of this organ, and usually leads to a decrease in immunity. The program supports spleen function by reducing the adverse effects of negative psychological factors .</p> <p>Application: daily for a month, in conjunction with DeVita Ritm programs (see "Stop stress" complex). In order to maintain immunity under constant stress, the scheme is used in a cycle of 2-3 times a year.</p>
102	Healing	<p>Healing of the body is impossible without the process of regeneration, which occurs at different levels of organization - system, organ, tissue, cellular, intracellular. The program activates the regeneration process in various inflammations (infectious, non-infectious) or damage to the integrity of organs and tissues (trauma), thereby enhancing the healing process.</p> <p>Application: daily for one month. If necessary, the program is used until full recovery.</p>
103	Stop Gardnerella	<p>Gardnerella is a bacterium that is part of the normal biocenosis of women, actively multiplying when local immunity is weakened, causing inflammation of the genitourinary organs. The program induces the death of bacteria, and reduces inflammation.</p> <p>Application: daily for 2-3 weeks, in conjunction with the "Without toxins" program on DeVita AP and the corresponding programs on DeVita Ritm (see "Women's Health" complex). To prevent re-infection, sexual partners should use the program at the same time.</p>
104	Male power	<p>Men have faced the problem of erectile dysfunction at all times and regardless of age. One of the causes of this problem is chronic prostatitis. The program reduces the inflammatory process, contributes to the restoration of normal functioning of the reproductive system, reduces the chance of complications (impotence, infertility).</p> <p>Application: daily for a month, in conjunction with programs on DeVita Ritm (see "Men's Health" complex)"</p>
105	Without actinomycetes	<p>Actinomycetes are soil microorganisms. They form colonies on skin and mucous membranes without causing disease. They are capable of penetrating the human body only through damaged skin, mucous membranes. They become active under the influence of various factors, which include damage to the mucosa, the presence of infectious diseases, weakened immunity, diabetes mellitus, cancer, etc. The program prevents the spread of infection, and reduces the risks of complications.</p> <p>Application: daily, in conjunction with the "Without toxins", "Restoration 2- Automatic" programs on DeVita AP.</p>

106	Stop gonococcus	<p>A bacterium that causes inflammation of the genitourinary tract. It's transmitted sexually. The program inhibits microorganisms, and reduces inflammation.</p> <p>Application: daily for a month, in conjunction with the "Without toxins" program on DeVita AP and the corresponding programs on DeVita Ritm (see "Women's Health", "Men's Health" complexes). To prevent re-infection, sexual partners should use the above scheme at the same time.</p>
107	Stop parvovirus	<p>A virus that affects the joints and causes chronic anemia. The virus is dangerous for people with weakened immune systems and blood diseases. The program induces the death of the virus, and reduces the risk of complications.</p> <p>Application: daily month, in conjunction with the "Without toxins" program on DeVita AP.</p>
108	Without tuberculosis	<p>A chronic infectious disease caused by bacteria. It affects respiratory organs, bones and joints, genitourinary organs, eyes, peripheral lymph nodes. The following factors can provoke the disease: reduced immune defense, stress, chronic diseases of the lungs and GI tract, bad habits, living conditions. The program fights the root cause of the disease - the pathogenic flora.</p> <p>Application: daily for a month, in conjunction with the "Without toxins" program on the DeVita AP and the "Healthy day" and "Health" programs on the DeVita Ritm.</p>
109	Without brucella	<p>Brucella is the bacteria that causes brucellosis. The disease is transmitted by ingestion of contaminated food (thermally unprocessed meat and dairy products), contact with an infected animal, or by aerosol transmission. The disease affects almost all organs, occurs in both acute and chronic forms. The program suppresses bacteria and reduces the toxic load on the body.</p> <p>Application: daily for a month, in conjunction with the "Without toxins" program on DeVita AP and the corresponding programs on DeVita Ritm.</p>
110	Skin without acne	<p>Acne is a disease of the hair follicles and sebaceous glands that is more common in adolescents and young adults. There is a distinction between non-inflammatory and inflammatory acne. The program reduces inflammation, promotes the regulation of normal skin function, and improves the skin's condition.</p> <p>Application: daily for a month, in conjunction with the "Stop acne bacteria" program on DeVita AP and the corresponding programs on DeVita Ritm (see Clear Skin Complex).</p> <p>In case of skin predisposition to acne formation, in order to prevent inflammation, it is desirable to use the program every quarter according to the above scheme.</p>
111	Fungus-free skin	<p>Dermatomycosis is an infectious disease of the skin and its appendages, which is caused by various pathogenic, conditionally pathogenic fungi. The following factors contribute to the development of the disease: dermatitis, chronic diseases, poor personal hygiene, and professional factors. The program reduces toxic load and inflammation.</p> <p>Application: daily for a month, combined with anti-fungal programs.</p>
112	Straight spine	<p>Spinal curvature is a disruption in the proper alignment of the spinal column. Any curvature of the spine can lead to not only back pain, but also internal organ problems. Various factors influence the curvature of the spine: weakness of the muscular corset of the back; sedentary behavior; asymmetrical types of physical activity; constant tilting of the torso forward when sitting; carrying a bag or backpack on one side; diseases of the musculoskeletal system. The program helps reduce muscle spasm, reduces pain, promotes muscle recovery, and improves the health of all tissues of the spine.</p> <p>Application: daily, in conjunction with the "Healthy spine-automatic", "Healthy spine-automatic" programs on DeVita Ritm.</p>
113	Stop pain (low back)	<p>Discomfort in the lower back is common to almost every person in their 30s and older. There are many reasons for this: circulatory disorders; degenerative changes; trauma; infections, etc. The program reduces pain and improves blood flow in the lower back area.</p> <p>Application: daily for a month or as needed in conjunction with the "Low back without inflammation" program on the DeVita AP and the "Joints without pain-automatic" and "Healthy spine-automatic" programs on the DeVita Ritm.</p>
114	Without allergies new	<p>The occurrence of allergies in humans is influenced by a number of factors. Among them: household allergens, working conditions, genetic predisposition and other factors. These conditions can not only cause allergic reactions, but can contribute to the development of asthma. The program reduces allergies, promotes better breathing by relieving spasm, and it improves well-being.</p> <p>Application: daily for a month or as needed, in conjunction with the corresponding programs on program on DeVita AP and the DeVita Ritm (see Stop allergy complex).</p>

115	Without fluke	<p>The Siberian or cat liver fluke a flatworm which belongs to the class of trematodes. It causes opisthorchiasis, affecting organs such as the gallbladder, pancreatic ducts, and bile ducts of the liver. Infection occurs by eating low-salted, undercooked food, raw fish; by using household appliances that have come into contact with such fish; by failing to maintain personal hygiene after visiting a restroom or cleaning animal toilets and interacting with them. The program deals with the parasite at all stages of its development.</p> <p>Application: daily for a month, in conjunction with the "Without toxins" program on DeVita AP and the corresponding programs on DeVita Ritm (see Stop parasites complex). It is mandatory to maintain personal hygiene. To consolidate the result, it is desirable to repeat the cycle in a month.</p>
116	Stop dementia	<p>A number of reasons can lead to impaired thinking abilities in a person: vascular diseases, Alzheimer's disease, trauma, brain neoplasms, alcoholism, drug addiction, CNS infections and some other diseases. The program helps maintain brain function.</p> <p>Application: daily for a month, repeat the cycle at regular intervals every quarter. Use in conjunction with the " Blood circulation in the head" program and the corresponding programs on the DeVita Ritm.</p>
117	Stop Parkinson	<p>The disease is characterized by damage to nerve cells in the brain stem and is expressed by slowness of movement, tremors at rest and impaired reflexes. It is common in the elderly. The program helps to slow the progression of the disease.</p> <p>Application: daily for a month, repeat the cycle at regular intervals every quarter. Use in conjunction with the " Blood circulation in the head" program and the corresponding programs on the DeVita Ritm.</p>
118	Stop pain (injury)	<p>Nobody is safe from injury. Injuries are accompanied by pain, swelling, violation of tissue integrity and other signs. The program reduces pain, swelling, and speeds up the regeneration process.</p> <p>Application: daily for a month, in conjunction with the "Stop Injuries" and "Blood circulation regulation" program on DeVita Ritm.</p>
119	Strong nerves	<p>Amid a prolonged nervous overstress due to prolonged illness, life troubles, loss of loved ones and other reasons can arise nervous disorders characterized by irritability, general fatigue, apathy, mood swings. The program helps to normalize the psychological state, helps to improve mood and general condition.</p> <p>Application: daily for a month, in conjunction with DeVita Ritm programs (see "Stop Stress" complex).</p>
120	Good sleep	<p>Healthy sleep is the key to good mood and well-being. But stressful situations at home and work, lifestyle changes and other reasons can trigger insomnia. The program reduces the irritability of the nervous system and promotes restful sleep.</p> <p>Application: daily for a month, in conjunction with the "Strong nerves" program and the corresponding programs on DeVita Ritm (see Stop insomnia).</p>
121	Calm intestines	<p>Stomach heaviness, heartburn, bloating, rumbling, meteorism, stool problems can all be signs of irritable bowel. Such a condition is typical for people in developed countries. The program reduces the severity of pain, relieves mucosal inflammation, normalizes GI motility.</p> <p>Application: daily for a month, in conjunction with the "Intestines without disorders" program on DeVita AP and the corresponding programs on DeVita Ritm (see Digestion without problems complex).</p>
122	Healthy Stomach	<p>Stomach pain is familiar to almost every other person. The causes of such pains are: functional disorders, intestinal infections, gastritis, etc. Stress, improper nutrition, taking some medications can provoke pain. The program relieves pain, reduces inflammation, helps normalize the stomach.</p> <p>Application: daily for a month, in conjunction with the "Healthy stomach" program on DeVita Ritm and the "Stop stress" or "Digestion without problems" complex programs. In order to prevent exacerbations, the cycle is carried out 2-3 times a year.</p>
123	Duodenitis, stop!	<p>Eating disorders, consumption of foods that irritate the mucosa of the GI tract, diseases of the stomach, liver and pancreas can cause inflammation of the mucous membrane of the duodenum and pancreas, which is often accompanied by severe pain. The program relieves pain and helps mucous membrane recovery.</p> <p>Application: daily for a month, in conjunction with the corresponding programs on the DeVita AP and the "Stomach+ Automatic" program on the DeVita Ritm.</p>

124	Healthy pancreas	<p>The pancreas plays an important role in the digestive and endocrine systems, it produces enzymes that aid the digestive process and the hormone insulin that regulates blood sugar levels. Therefore, it is very important to keep it functioning properly. The program reduces discomfort and maintains the function of the pancreas.</p> <p>Application: daily for a month, in conjunction with the corresponding programs on DeVita AP and DeVita Ritm.</p>
125	Blood sugar under control	<p>Stress, high-carbohydrate diets, medications, and endocrine and internal organ diseases lead to high blood sugar. It is possible to balance sugar levels by combining diet, exercise and the "Blood sugar under control" program.</p> <p>Application: daily for one month.</p>
126	Stop diabetes	<p>Diabetes is a disease characterized by chronically elevated blood glucose levels. There is a risk of cardiovascular disease, loss of vision, decreased immunity, and impaired blood supply to the lower extremities. The program helps to minimize possible risks.</p> <p>Application: daily for a month, in conjunction with the program "Blood sugar under control" on DeVita AP and basic programs on DeVita Ritm complex "Digestion without problems" and special programs "Normal blood sugar", "Healthy Pancreas". The full cycle is performed 2 times a year, the rest of the time the DeVita Ritm programs are used.</p>
127	Small intestine	<p>The small intestine performs several important functions: digestion of food; absorption of nutrients; movement of remaining substances to the GI tract; hormone production; and immunological defense. Most often people are faced with functional disorders and inflammatory processes in this part of the intestine. The program helps to reduce pain and inflammatory manifestations, helps to normalize bowel function.</p> <p>Application: daily for a month, in conjunction with the corresponding programs on program on DeVita AP and the DeVita Ritm (see Digestion without problems complex).</p>
128	Intestines without disorders	<p>Disorders of the intestines can appear with functional impairments in its work, infectious diseases or stress. They are accompanied by abdominal pain, bloating, and constipation and/or diarrhea. The program reduces pain, helps normalize the work of the large intestine.</p> <p>Application: daily for a month, in conjunction with the "Calm intestines" program on DeVita AP and the corresponding programs on DeVita Ritm (see Digestion without problems complex).</p>
129	Without hemorrhoids	<p>Hemorrhoids are the result of impaired blood circulation and inflammation in the blood vessels of the rectum. The disease is equally common in men and women, and brings great discomfort. The program relieves pain, reduces inflammation, and improves vascular health.</p> <p>Application: daily for one month. To minimize the occurrence of the disease, it is necessary to control the influence of risk factors; take a cycle using the schemes of complexes "Digestion without problems", "Heart and blood vessels" or others, depending on the cause of the problem.</p>
130	Stop pelvic inflammation	<p>Inflammatory processes in the pelvic area can be both independent diseases and complications of previously experienced diseases. One of the most common causes can be considered bacterial and viral infections. The program reduces inflammation and relieves pain.</p> <p>Application: daily for a month, in conjunction with the DeVita AP and DeVita Ritm programs for relevant infectious agents (see "Women's Health" and "Men's Health").</p>
131	Stop chickenpox	<p>Chickenpox is an infectious disease caused by the varicella-zoster virus that affects the skin and nervous system. It is transmitted by airborne and contact. It is more severe in adults. The program fights the pathogen, reducing the manifestation of intoxication and the occurrence of complications.</p> <p>Application: daily for 2 weeks, in conjunction with the "Without toxins" program on DeVita AP.</p>
132	Stop rubella	<p>Rubella is an acute viral infection that is very "contagious". It's transmitted by airborne droplets. The program inhibits the development of the virus and its spread in the body.</p> <p>Application: daily month, in conjunction with the "Without toxins" program on DeVita AP.</p>
133	Without mumps	<p>Mumps is an acute infectious disease caused by a virus of the paramyxovirus genus. The main signs of the disease are intoxication and inflammation of the parotid salivary glands. The virus is transmitted by airborne and household contact. The program fights the virus, reducing the manifestation of intoxication and the occurrence of complications.</p> <p>Application: daily for 2 weeks, in conjunction with the "Without toxins" program on DeVita AP.</p>

134	Stop scarlet fever	Scarlatina is an acute bacterial infection that is transmitted by airborne and household contact. Characterized by disease of the upper respiratory tract, tonsils. The program destroys pathogenic bacterial flora, reducing intoxication, reducing the risks of complications. Application: daily month, in conjunction with the "Without toxins" program on DeVita AP.
135	Stop measles	Rubella is an acute viral infection that is very "contagious". It's transmitted by airborne droplets. The program suppresses the development of the virus, relieves signs of intoxication, reduces the chances of complications. Application: daily month, in conjunction with the "Without toxins" program on DeVita AP.
136	No diphtheria	Diphtheria is an acute bacterial infection that is transmitted by airborne droplets and airborne dust. It is possible to be infected through the contact and domestic means (utensils, dirty hands, etc.), as well as alimentary (food). The disease is characterized by lesions of the upper respiratory tract, and oropharyngeal mucosa. The program fights the pathogen, reduces signs of intoxication and prevents the spread of inflammation to other organs. Application: daily month, in conjunction with the "Without toxins" program on DeVita AP. Use the appropriate programs on the DeVita Ritm and DeVita AP if necessary.
137	Stop cholera	Cholera is an acute bacterial infection, transmitted by fecal-oral route through water or contaminated food. The main symptoms are vomiting, diarrhea, and abdominal pain. The program inhibits the development of the bacteria, which helps to reduce intoxication and improve the person's condition. Application: daily month, in conjunction with the "Without toxins" program on DeVita AP. It is mandatory to maintain personal hygiene. In order to prevent the disease, for persons visiting countries in Asia (India), Africa, South America, each time during and/or after travel - daily for 2 weeks.
138	Stop pertussis	Pertussis is an acute bacterial infection with damage to the respiratory, cardiovascular and nervous systems. The path of transmission of the pathogen is airborne. The program fights the pathogen by reducing the effects of toxins on cells and preventing inflammation from spreading to other organs. Application: daily for a month, in conjunction with the "Without toxins" program on DeVita AP and the "Cellular respiration" and "Free Breath" programs on DeVita Ritm.
139	Without constipation	Improper nutrition (lack of dietary fiber, liquids), sedentary work, stress, change of climatic area during relocation, impaired motility of the large intestine and other factors can cause difficult or systematically obstructed defecation. Prolonged chronic constipation can contribute to the development of complications in the digestive tract. The program helps to stimulate bowel function and strengthen the intestinal muscle tone. Application: daily for a month, in conjunction with the corresponding programs on DeVita AP and DeVita Ritm (see "Digestion without problems", "Stop stress" complexes. To prevent further constipation, introduce fiber-rich foods into your diet and eliminate foods that aggravate constipation. Increase fluid intake. With a predisposition to this problem, frequent relocations, stress, the cycle is carried out 2-3 times a year.
140	Blood circulation in the head	Insufficient blood supply to the organs of the head can lead to undesirable consequences: headache, dizziness, tinnitus, decreased visual and hearing acuity, impaired perception, attention, memory. The program helps to improve blood flow to the tissues of the head organs, thereby increase the flow of oxygen and nutrition to them. Application: daily for a month, in conjunction with the corresponding programs on program on DeVita AP and the programs DeVita Ritm (see Heart and Blood Vessels complex).
141	For women	Abundant and painful menstruation, irregularity of the cycle, may be the cause of endometriosis. One of the complications of this disease is infertility. There are many causes of the disease: hormonal disorders, decreased immunity, heredity, etc. The program helps to restore hormonal balance, normal functioning of the reproductive system. Application: daily for a month, in conjunction with the "Stop pelvic inflammation" program on DeVita AP and the programs DeVita Ritm (see Women's health complex).

142	Stop spasm (muscles)	<p>The superficial and deep back muscles are like a corset, supporting the spine in the correct position. Lifting heavy weights, spending long periods of time in an uncomfortable position, poor posture, problems with the musculoskeletal system cause spasms of the back muscles, accompanied by pain. The program helps to relieve spasm, pain, reduces inflammation, and improves a person's condition.</p> <p>Application: daily for a month, in conjunction with the DeVita AP "Muscles without tension" program and the DeVita Ritm "Healthy spine-automatic" and "Joints without pain-automatic" programs. To strengthen the muscular corset of the back, regular training of all back and abdominal muscles using special DeVita Ritm programs is essential (see "For Athletes" complex).</p>
143	Without motion sickness	<p>Motion sickness is caused by the vestibular apparatus – the organ of balance and orientation in space, which is located in the inner ear. When motion sickness occurs, feelings of nausea and dizziness are experienced. The program relieves cramps, nausea, and improves health.</p> <p>Application: every time you travel in transport, in conjunction with the "Blood circulation regulation" program on the DeVita Ritm.</p>
144	Stop spasm (Intestines)	<p>The pain associated with intestinal spasm can occur in connection with violations of various mechanisms of intestinal motility, with intoxication, against the background of digestive disorders, stressful situations, helminthiasis, etc. The program helps to relax the intestinal wall, reduce pain.</p> <p>Application: daily for a for one month, in conjunction with the corresponding programs on DeVita AP and DeVita Ritm (see "Digestion without problems", "Stop stress" complexes).</p>
145	Stop conjunctivitis	<p>Conjunctivitis is an inflammation of the mucous membrane, occurs most often with viral or bacterial infection, allergies. It is characterized by redness, swelling and itching. The program helps to reduce inflammation, swelling and itching.</p> <p>Application: for infections daily for a month, in conjunction with the appropriate programs on the DeVita AP . For allergies, daily for the entire period of exposure to allergens, in conjunction with the corresponding programs on DeVita AP and DeVita Ritm (see "Stop Allergy" complex).</p>
146	Muscles without tension	<p>Muscle tension can be caused by injuries, uncomfortable posture, poor posture, osteochondrosis, stress, or disease. The program reduces pain, increases muscle elasticity, and reduces muscle tone.</p> <p>Application: daily for a month, in conjunction with the "Stop spasm (muscles) program on DeVita AP and "Muscles without pain" on DeVita Ritm.</p>
147	Stop fatigue	<p>Fatigue is characterized as a state of exhaustion, manifested by a feeling of weakness, lethargy, feelings of physiological discomfort, disturbances in the flow of mental processes. Fatigue can be the result of overwork, poor sleep, worries, lack of exercise, anxiety, and illness. It is most frequent in residents of large cities. The program reduces the irritability of the nervous system and helps to increase performance.</p> <p>Application: daily for a month, in conjunction with the "Strong nerves", "Blood circulation in the head" programs on DeVita AP and the programs DeVita Ritm (see Stop stress complex).</p>

DEVITA AP AUTOMATIC PROGRAMS DESCRIPTION

Name	Effect of the program	Programs	Working time
Mode 1 Automatic	It inhibits the activity of viruses, inhibits the vital activity of protozoan microorganisms. Optimal disease prevention when changing climatic zones, visiting Asian countries.	Antivirus, No protozoans, Without toxins	6:47
Mode 2 Auto-matic	Relieves toxic load caused by streptococcal and staphylococci. It is effective both for colds and for the prevention of coccal infections.	No staphylococcus, No streptococcus, Without toxins	7:53
Mode 3 auto-matic	It contributes to the removal of bacterial aggravation of the digestive tract and the genitourinary system.	Healthy gastrointestinal, Intimate health, Without toxins	8:26
Mode 4 Automatic	It removes mycotoxins formed by mold and yeast. Reduces the risk of accumulation of carcinogenic factors	Stop candida, No mould & fungi, Without toxins	7:47
Cleansing-automatic	It promotes the elimination of toxins, the normalization of lymph outflow, and the strengthening of lymphatic vessels. Helps the removal of excess fluid from the intercellular space, has an antiseptic effect.	Healthy lymph, Drainage - General	7:10
No parasites Automatic	Reduces the stress parasitic burden of the liver, pancreas, intestines, as well as the toxic load caused by the vital activity of these forms.	No parasites, Digestive tract, No parasites, General, Without toxins	7:38
No flu - automatic	It suppresses the activity of various strains of the influenza virus, helps relieve symptoms of intoxication and alleviates the human condition during the illness.	Anti-Flu, Against flu - General, Without toxins	6:38
Stop herpes S-automatic	It prevents the development of herpes simplex and its toxic effect on the body: the formation of vesicles on the mucous membranes, skin, reduces itching.	No herpes, No herpes simplex, Without toxins	7:35
No herpes Z-automatic	It reduces the activity of zoster herpes viruses, reduces the toxic signs of its manifestation on the surface of the skin and pain.	No herpes zoster, No herpes, Without toxins	5:47
Without cold automatic	Prevents the development of respiratory viruses, reduces symptoms of intoxication, leads to a decrease in inflammatory reactions and the likelihood of complications	Antivirus, Anti-Cold, Without toxins	8:09
Support immune system-Automatic	It blocks the activity of various viruses, their distribution in the human body, promotes the activation of immunity. It is effective as prevention of colds infections during hypothermia and during the period of mass diseases.	Antivirus, Without toxins	5:03
Weight Reduction-Automatic	Reduces parasitic load and destroys viruses that are the cause of excess weight. It normalizes the functioning of the autonomic nervous system, maintains the body tone and improves the psychoemotional state.	Weight Control, Without toxins	4:28
Reduce Points-automatic	It cleanses the body of toxins, normalizes lymphatic drainage, supports the immune system and increases vital energy.	Healthy lymph, Without toxins	4:31
Cell Protection 1 -Automatic	The program helps to relieve viral, bacterial and toxic loads, increasing the body's defenses.	Antivirus + No streptococcus + No herpes simplex + Without toxins	12:09
Cell Protection 2 -Automatic	Prevents the effects of carcinogenic factors on the human body, thereby reducing the risk of cell degeneration.	Healthy Cell 1 + Healthy Cell 2 + Antivirus Gastrointestinal + No Trichomonas	13:54

Cell Protection 3 –Automatic	The program helps to resist viral, bacterial and protozoa infections, reducing the degree of intoxication.	No herpes zoster + No staphylococcus + No chlamydia + Intimate health + Stop Amoeba	12:42
Cell Protection 4 –Automatic	The program reduces the fungal toxic load, increasing your own protection and reduces the likelihood of tumor processes.	Healthy Cell 1 + Healthy Cell 2 + Stop candida + Stop Penicillum	12:48
Lyme 1 - Automatic	The program helps to remove viral, bacterial and toxic loads, increasing the body's defenses.	Antivirus + No streptococcus + No herpes simplex + Without toxins	12:09
Lyme 2 - Automatic	The program works to destroy pathogens that have been ingested by a tick bite and to reduce the total toxic load.	Against Lyme Disease 1 + Against Lyme Disease 2 + Antivirus Gastrointestinal + No Trichomonas	11:39
Lyme 3 - Automatic	The program helps to resist viral, bacterial and protozoa infections, reducing the degree of intoxication.	No herpes zoster + No staphylococcus + No chlamydia + Intimate health + Stop Amoeba	12:42
Lyme 4 - Automatic	The program reduces the fungal toxic load, increasing the body's defenses while fighting borrelia.	Against Lyme Disease 1 + Against Lyme Disease 2 + Stop candida + Stop Penicillum + Without toxins	11:51
Restoration 1 - Automatic	The program is aimed to relieve pain after dental interventions, repair damaged mucosa, reduce swelling, and accelerate tissue regeneration.	Stop Injury (teeth) + Healthy mouth	6:33
Restoration 2 - Automatic	The program reduces the influence of pathogenic factors, reducing the degree of the inflammatory process. Promotes speedy recovery.	Antiseptic+Anti-inflammation - General	6:09
Healthy Gums - Automatic	The program helps to reduce the inflammatory process of the oral cavity, improves trophic tissue, strengthens local immunity.	Healthy Gums+Mucous membrane Regeneration	6:48
Nerve Regeneration - Automatic	The program is aimed at improving the functioning of the nervous system in case of damage by pathogens that have entered the body due to a tick bite. It reduces swelling, helps restore the integrity of the nerve fiber and nerve connections of various parts of the nervous system.	Healthy Nerves+CNS Without Problems	4:51
Healthy Breathing	The program aims to suppress the activity of viruses and bacteria that cause respiratory tract diseases, helps to reduce the likelihood of exacerbations, reduce intoxication, increase the body's defenses.	Stop coronavirus NEW + Bacterial pneumonia + Without toxins	10:37
Without motion sickness -automatic	The program helps relax the intestinal wall, reduces pain, nausea, and promotes better health. Application: use preferably 30 min before travel.	Without motion sickness Stop spasm (Intestines)	4:35
Sos! Allergy - Automatic	The program reduces allergic manifestations, promotes better breathing by relieving spasm, reducing inflammation, relieving swelling and itching. Application: daily for the entire period of exposure to allergens or as needed, in conjunction with the corresponding programs on DeVita Ritm (see "Stop Allergy" complex).	Without allergies new Stop conjunctivitis	6:14

Restoration 3 -automatic	<p>The program improves blood supply to organs and tissues, activates the regeneration process especially after infectious diseases or injuries.</p> <p>Application: daily for a month, if necessary use the program until full recovery, in conjunction with DeVita Ritm programs (see Heart and blood vessels complex).</p>	Restoration of blood circulation Healing	2:53
Deep sleep- automatic	<p>The program normalizes the psychological state, reduces the excitability of the nervous system, improves mood and promotes restful sleep.</p> <p>Application: daily for a month, in conjunction with DeVita Ritm programs (see "Stop Stress" complex) or "Stop insomnia"</p>	Strong nerves Good sleep	6:20
Stop brain aging - automatic	<p>The program helps maintain brain function, slows down the process of neuron destruction, helps improve blood supply to the tissues of the head organs, thereby increasing the flow of oxygen and nutrition to them.</p> <p>Application: daily for a month, in conjunction with the corresponding programs on program on DeVita Ritm (see Heart and blood vessels complex). Repeat the cycle regularly every quarter.</p>	Stop dementia Stop Parkinson Blood circulation in the head	9:36
Stop fatigue- automatic	<p>The program reduces the agitation of the nervous system, helps to normalize the psychological state, improves blood supply to the tissues of the organs of the head, helps to increase performance.</p> <p>Application: daily, in conjunction with DeVita Ritm programs (see "Stop stress" complex).</p>	Strong nerves Blood circulation in the head Stop fatigue	9:09
Anti-inflammation (female) -automatic	<p>The program reduces the inflammatory process, relieves pain, helps to restore hormonal balance, normal functioning of the reproductive system.</p> <p>Application: daily for a month, in conjunction with the DeVita AP and DeVita Ritm programs for relevant infectious agents (see "Women's Health" complex).</p>	Stop pelvic inflammation For women	6:35
Anti-inflammation (male) -automatic	<p>The program helps to reduce the inflammatory process, restore the normal functioning of the reproductive system, reduces the chance of complications (impotence, infertility).</p> <p>Application: daily for a month, in conjunction with the DeVita AP and DeVita Ritm programs for relevant infectious agents (see "Women's Health" and "Men's Health" complexes).</p>	Stop pelvic inflammation Male power	5:56
Active Gastro -automatic	<p>The program helps to relieve pain, reduce inflammation, restore mucosa, normalize the stomach, gallbladder, and pancreas.</p> <p>Application: daily for a month, in conjunction with the DeVita Ritm program "Stomach+ automatic" and the programs of the complex "Stop stress" or "Digestion without problems". In order to prevent exacerbations, the cycle is carried out 2-3 times a year.</p>	Healthy Stomach Duodenitis, stop! Healthy pancreas	9:21
Bowel without irritation	<p>The program reduces pain, meteorism, bloating, relieves inflammation of the mucosa, normalizes the motility of the GI tract.</p> <p>Application: daily for a month, in conjunction with the corresponding programs on DeVita Ritm (see "Digestion without problems" complex).</p>	Calm intestines Intestines without disorders	7:56

Without constipation -automatic	<p>The program helps to relieve spasms, reduce pain, normalizes the motility of the large intestine.</p> <p>Application: daily for a for one month, in conjunction with the corresponding programs on DeVita AP and DeVita Ritm (see "Digestion without problems", "Stop stress" complexes).</p>	Without constipation Stop spasm (Intestines)	3:44
Skin without pimples -automatic	<p>The program fights pathogenic microflora, reduces inflammation, removes toxins from the body, regulates the barrier function of the skin, improves its condition.</p> <p>Application: daily for a month, in conjunction with the "Mode 2-automatic" program on DeVita AP and the corresponding programs on DeVita Ritm (see Clear Skin complex).</p> <p>In case of skin predisposition to acne formation, in order to prevent inflammation, it is desirable to use the program every quarter according to the above scheme.</p>	Stop acne bacteria Without toxins Skin without acne Stop pimples	5:01
Healthy nails -automatic	<p>The program causes the death of pathogenic fungi, reduces inflammation, removes toxins, helps restore the integrity of the skin of the feet and nails, and improves their condition.</p> <p>Application: daily for a month, in conjunction with the corresponding programs on DeVita Ritm (see "Clean skin" complex). It is mandatory to maintain personal hygiene. To consolidate the result, it is desirable to repeat the cycle in a month. In order to prevent the occurrence of the disease - once or twice a year (fall-spring).</p>	No onychomycosis Without trichophyton Nails without fungus Without microsporium Without toxins	10:41
Stop skin fungus -automatic	<p>The program inhibits the development of fungal flora on the scalp and body, reduces inflammation, reduces toxic load, and promotes a better quality of life.</p> <p>Application: daily for a month, in conjunction with the corresponding programs on DeVita Ritm (see "Clean skin" complex). It is mandatory to maintain personal hygiene. To consolidate the result, it is desirable to repeat the cycle in a month.</p>	Without Epidermophyton Without trichophyton Without microsporium Fungus-free skin Without toxins	8:23
Low back without pain -automatic	<p>The program relieves pain and improves blood flow in the lower back area.</p> <p>Application: daily for 2-4 weeks or as needed, in conjunction with the programs "Joints without pain-automatic", "Healthy spine-automatic" on DeVita Ritm .</p>	Low back without inflammation Stop pain (low back)	6:14
Healthy back -automatic	<p>The program helps to reduce muscle spasm, reduce pain, promotes muscle fiber repair, increases muscle elasticity, reduces muscle tone, and improves the condition of all tissues of the spine.</p> <p>Application: daily for a month, in conjunction with the programs "Joints without pain-automatic", "Healthy spine - automatic" on DeVita Ritm .</p>	Straight spine Stop spasm (muscles) Muscles without tension	8:24

EXPLANATIONS FOR THE USE OF PROGRAMS DEVITA AP

DeVita AP (manual programs)				
Name of the program	In which cases the program can be used	Effect	First results	Lasting effect
No staphylococcus	Purulent wound infections, infection, purulent inflammatory diseases of various organs (upper respiratory tract, throat, skin, musculoskeletal system, external genital organs, urinary system, meninges, foodborne toxicosis). Prevention of fetal infection during pregnancy.	Antibacterial Anti-inflammatory	2-3 hours	10-14 days
No streptococcus	Diseases of the ear, throat, nose, inflammatory processes of the musculoskeletal system, heart, kidneys, skin. Prevention of fetal infection during pregnancy.	Antibacterial Anti-inflammatory	2-3 hours	10-14 days
No chlamydia	Infections of the genitourinary system, joints, eyes, upper and lower respiratory tracts, as well as the cardiovascular system. Prevention of occupational diseases among people working with birds. As well as prevention of infection through water during bathing and transmission of the infection to the fetus during pregnancy.	Antibacterial Anti-inflammatory	1-2 days	10-14 days
No helicobacter	Inflammation of the stomach, duodenum, damage to the mucous membranes of these organs.	Antibacterial Anti-inflammatory	5-7 days	3-5 weeks
No bacteria	Problems caused by Klebsiella: inflammation of the respiratory system, urinary tract, meninges, eyes, intestinal infections, blood poisoning. Problems caused by listeria: inflammation of the digestive tract, meninges, joints, respiratory organs. In order to prevent occupational diseases of people involved in animal husbandry, poultry farming, primary processing of meat and skins. Problems caused by pneumococcus: inflammation of the respiratory tract, ears, joints, meninges, blood poisoning.	Antibacterial Anti-inflammatory	Within 1 day	14-21 days
No hepatitis A	Prevention of the virus infection when visiting countries of Asia and Africa, reduces the risk of complications.	Antiviral Anti-inflammatory	1-2 weeks	6 months
Without toxins	Mandatory program for any toxic load (viral, bacterial, protozoal, mycotic, parasitic)	Antitoxic Energy saving	1-2 hours	1 month
No herpes zoster	Shingles - skin rashes, accompanied by severe pain along the sensory nerve.	Antiviral Anti-inflammatory Anesthetic	Within 1 day	1 month
No herpes simplex	Genital herpes and herpes (cold sore) on the lips.	Antiviral Anti-inflammatory	Within 1 day	1 month

No herpes	As an addition to any of the antiherpetic programs to reduce the time of recovery and reduce inflammatory and pain manifestations.	Antiviral Anti-inflammatory Antipruritic	Within 1 day	1 month
Healthy lymph	Disorders in the lymphatic system manifested by the following symptoms: swollen fingers and a tendency to swelling, chronic fatigue, constipation, discolored skin on the legs, chest pain and swelling, dry irritated skin, inability to concentrate, cold hands and feet, cellulite.	Anti-inflammatory Decongestant Antitoxic	Within 1 day	1 month
Anti-Cold	Diseases of the nose, throat, bronchi. In conjunction with the programs: "No Staphylococcus", "No Streptococcus", "No Bacteria".	Antiviral Anti-inflammatory Decongestant	2-3 hours	5-7 days
No mould & fungi	Lesions of the skin, subcutaneous fat, mucous membranes, visual and hearing apparatus, bones, joints, as well as internal organs (bronchopulmonary system, liver, spleen, heart, blood vessels, gastrointestinal tract, kidneys, central nervous system), allergic reactions in the form of cough, nasal congestion, skin rashes. Effective in prevention of fungal infections after visiting the sauna, pool, beach, with prolonged exposure to damp rooms.	Antifungal Anti-inflammatory	1-2 days	2 months
No candida	Diseases of the mucous membranes of the internal organs, skin, accompanied by rashes, dysbiosis, burning sensation in the genitals.	Antifungal Anti-inflammatory	2-3 days	1 month
No fungi	Damage to the skin, hair, nails, mucous membranes of the internal organs by fungi of the genus: trichophyton, microsporum, mucor. Effective in prevention of fungal infections after visiting the sauna, pool, beach, getting in contact with an infected person.	Antifungal Anti-inflammatory Antipruritic	2-3 days	3-6 months
No protozoans	Inflammatory processes of the digestive tract caused by a number of protozoa: giardia, amoeba, etc. Prevention of infection through water when swimming.	Anti-protozoan Anti-inflammatory	2-3 days	1 month
Intimate health	Diseases of the mucous membrane of the respiratory tract, genitourinary tract caused by pathogens such as: ureaplasma, mycoplasma, toxoplasma. Prevention of transmission of infection to the fetus, sexual partner.	Antibacterial Anti-protozoan Anti-inflammatory	2-3 days	1 month
No schistosomes (blood-flukes) & trematods	Damage to the liver, pancreas, lungs, circulatory and genitourinary systems, toxic-allergic reactions caused by a number of flukes: feline, hepatic, pulmonary, lanceolate, as well as schistosomes.	Antiparasitic	1-5 days	1 - 2 months

No nematodes and ascarides	Infection with roundworms, such as ascarides, pinworms, etc. Causing weight loss, peeling of the skin, rash, hair loss, bowel obstruction, inflammation of the respiratory tract, liver and pancreas. The program fights parasites at different stages of their life cycle.	Antiparasitic	2-3 days	1-2 months
No parasites, General	Suppression of the vital activity of various types of parasites. Used in combination with other helminth extermination programs.	Antiparasitic	2-3 days	1 - 2 months
No parasites, Digestive tract	Parasites of the liver and pancreas, duodenum ulcer. Used in combination with other helminth extermination programs.	Antiparasitic	2-3 days	1 -2 months
Anti-Flu	The program aims to destroy various strains of influenza viruses (A, B, C).	Antiviral	2-3 hours	5-10 days
Against flu - General	Mutated forms of flu, fever, pain.	Antiviral Antipyretic Anesthetic Anti-inflammatory	1-2 hours	5-10 days
Healthy gastrointestinal	Normalizes the condition and stops dehydration in case of dysbacteriosis caused by rotavirus infection, E. coli.	Antibacterial Antiviral Anti-inflammatory Protects cells Normalizes metabolism	2-3 hours	5-7 days
Help against poisoning	Normalizes the condition with Enterovirus infection and Salmonella infection.	Antibacterial Antiviral Anti-inflammatory Protects cells Normalizes metabolism Antitoxic	2-3 hours	10 days
Antivirus	Reduces the total viral load, cytomegalovirus infection, proceeding in the form of a persistent cold with headaches and joint pain, inflammation of the salivary glands.	Antiviral Anti-inflammatory	2-3 hours	1 month
Drainage, General	Infections of the upper respiratory tract, lymphoid tissue, liver, spleen caused by the Epstein-Barr virus.	Antiseptic Antitoxic Lymphatic drainage	Within 1 day	1 month
Drainage Antitox	With chemical toxic loads of the tissue sector with salts of heavy metals, radionuclides, food toxins.	Antitoxic Lymphatic drainage	1-2 days	14-21 days
Mexican detoxification	After surgical interventions, with chronic and drug intoxication.	Lymphatic drainage Decongestant Antitoxic Stabilizing Regulates excretory functions	6-7 days	1 month
No allergies	Various types of allergies (respiratory - odors, dust, pets, hay fever, skin, food), stabilizes the immune system.	Antitoxic Antiallergic Decongestant Anti-inflammatory Immunostabilizing	1-2 days	4-6 months

Weight Control	Presence of excess weight, impaired appetite, destroys one of the causes of obesity - Ad-36 adenovirus.	Antiviral Antitoxic	2-4 weeks	4-6 months
Against Lyme Disease 1	Tick bites. Those programs are used in pairs. If the bite happened earlier, you must take the full application scheme of the complex "Lyme Disease".	Antibacterial	1-2 days	14 – 28 days
Against Lyme Disease 2		Antiviral		
Against Cold - General	Diseases of the nose, throat, bronchi. Use together with the programs: "No staphylococcus", "No streptococcus", "No bacteria".	Decongestant Anti-inflammatory Anesthetic	1-2 days	1 month
Anti-inflammation - General	With any inflammatory processes in the body.	Decongestant Anti-inflammatory Anesthetic	1-2 days	1 – 2 months
Antiseptic	After surgical interventions, with any damage to the integrity of the skin and mucous membranes, with inflammatory processes.	Antiseptic Decongestant Anti-inflammatory Anesthetic Accelerates regeneration	2-3 hours	7 – 21 days
Anti-virus Gastrointestinal	Prevention of Coxsackie virus disease when visiting countries of Asia and Africa, reducing the risk of complications. The following symptoms can indicate the presence of the virus: dehydration, sore throat, the presence of a vesicle rash on the skin.	Antiviral Protects cells Normalizes metabolism	1-2 days	14 – 21 days
Clean Sinuses	Acute inflammation of the nasal mucosa and sinuses (sinusitis, sinusitis, etc.)	Decongestant Anti-inflammatory Anesthetic	1-2 days	14 - 21 days
Clean Sinuses - General	Together with antiviral and antibacterial programs.	Decongestant Anti-inflammatory Anesthetic Stabilizing	1-2 days	14 days
CNS Without Problems	For chronic problems with the nasal mucosa and sinuses. As one of the means of preventing an acute process in the upper respiratory tract for colds.	Decongestant Anesthetic Protects cells Revitalizing	2-3 days	6-12 months
Ears Without Inflammation	Pain and discomfort in the ear area arising from contact with infectious agents, water, pressure drop.	Decongestant Anti-inflammatory Anesthetic	1-2 days	14 - 21 days
Healthy Bile	Violation of the timely and uniform separation of bile into the intestine, which may be a consequence of irregular nutrition, consumption of harmful products, excessive consumption of fats, medicines, and the presence of parasites.	Anti-inflammatory Anesthetic Cholagogic	2-3 hours	1-4 months
Healthy Cell - 1	Prevents the development of cell mutations, reduces the negative effects of the environment and toxic load. Particular attention should be paid to those who live in adverse ecological areas, experience great emotional stress and the influence of negative production factors. Programs should be used in the "Healthy Cell" complex.	Antiviral Anti-inflammatory Protects cells	3-4 days	6-12 months
Healthy Cell - 2				

Healthy Gums	Presence of dentures, braces, crowns, as well as infections of the oral cavity that cause gum disease.	Anti-inflammatory Anesthetic Antitoxic Improves nutrition	2-3 hours	1 month
Healthy Mouth	Inflammation of the oral mucosa (sores, mucosal damage) that occurs when there are infectious agents, damage to the oral cavity, during dental interventions, an unbalanced diet.	Antiviral Anti-inflammatory Anesthetic Accelerates regeneration	1-2 days	1 month
Stop Injury (teeth)	The best effect will be acquired if used in combination with the program "Mucous Membrane Regeneration".	Anesthetic Decongestant Accelerates regeneration	2-3 hours	7-14 days
Mucous Membrane Regeneration	Inflammation of the oral mucosa (sores, mucosal damage) that occurs when there are infectious agents, damage to the oral cavity, during dental interventions, an unbalanced diet.	Anti-inflammatory Accelerates regeneration Immunostabilizing	1-2 days	1 month
Without Fistula	The best effect will be acquired if used in combination with the program "Healthy Mouth".	Anti-inflammatory Decongestant Antitoxic	1-2 days	7-14 days
Stop Adenovirus - General	After dental interventions (removal, treatment), in the presence of swelling of the gums, soreness.	Antiviral Anti-inflammatory	1-2 days	14-21 days
Healthy Nerves	Inflammation of the mucous membranes of the nose, throat, eyes, intestines.	Anti-inflammatory Protects cells	2-3 days	6-12 months
Stop Amoeba	Normalizes the condition with dysentery, gastroenteritis, intestinal ulcers, caused by the presence of protozoa. It is recommended to use to prevent infection when visiting tropical and subtropical countries of Asia, Africa, South America.	Anti-protozoan Anti-inflammatory Normalizes metabolism	2-3 days	1 month
Stop Coronavirus	Inflammation of the mucous membranes of the nose, throat, lungs.	Antiviral Anti-inflammatory	1-2 days	14-21 days
Without Klebsiella	Inflammation of the respiratory system, urinary tract, meninges, eyes, intestinal infections, blood poisoning. It is recommended as an addition for viral load, malnutrition, also for people with reduced immunity, people suffering from alcoholism, diabetes, chronic lung diseases, liver diseases.	Antibacterial Anti-inflammatory Antitoxic	1-2 days	14-28 days
Stop Migraine	Headaches of various origins.	Anesthetic Antispasmodic Normalizes blood circulation	Within 1 day	1 month
Stop Penicillium	Reduces toxic infections when using products affected by the fungus, in case of chronic diseases of the respiratory tract, kidneys, allergic reaction to penicillium.	Antifungal Anti-inflammatory	2-3 days	1 month

Throat Without Pain	Pain and swelling in the throat, nasopharynx, feeling of stuffiness, hoarseness or loss of voice arising from the inflammatory process.	Anti-inflammatory Decongestant Anesthetic Antitoxic	Within 1 day	14-21 days
Without Campylobacter	As an additional method to prevent infection and the development of diarrhea, for people working in livestock and poultry farms, as well as tourists visiting developing countries, people who use contaminated meat products, milk, water.	Antibacterial Anti-inflammatory	1-2 days	14-28 days
Without Clostridia	In case of damage to the integrity of the skin with contamination (cuts, bites, other injuries). When using expired or doubtful foods, canned foods, etc. Alternate with the "Without toxins" program throughout the day. Make sure to contact/see a doctor!	Antibacterial Anti-inflammatory	1-2 days	14-28 days
Without Cryptococcus	As one of the methods for preventing the disease, for people working in poultry farms engaged in breeding birds in an apartment or on their own farm. Particular attention is given to people with reduced immunity and chronic lung diseases located in places where birds gather.	Antifungal Anti-inflammatory	2-3 days	1 month
Without Enterococcus	Frequent and painful urination, pain during bowel movements, decreased potency, increased fatigue, depression, gastritis, dysbiosis, food poisoning.	Antibacterial Anti-inflammatory Antitoxic	1-2 days	14-28 days
Without Echinococcus	Prevention of helminthic invasion and damage to internal organs to people raising animals, livestock, collecting berries, fruits, vegetables, hunting. Especially living in South America and Europe, North Africa, New Zealand, Australia, in Russia in areas: Volga region, Western Siberia, Krasnodar Territory, in the Far East.	Antiparasitic	2-3 days	1-2 months
Without Leptospira	Jaundice, hemorrhagic fever, occupational diseases of pastoralists and agricultural workers.	Antibacterial Anti-inflammatory	1-2 days	14-28 days
Without nematodes and ascarididae - New	Infection with roundworms, such as ascariides, pinworms, etc. Causing weight loss, peeling of the skin, rash, hair loss, bowel obstruction, inflammation of the respiratory tract, liver and pancreas. An enhanced, expanded program fights parasites at different stages of their life cycle.	Antiparasitic Antitoxic	2-3 days	1-2 months
Without Kidney Papilloma	HPV damage to the mucous surface of the urinary system (renal pelvis and bladder).	Antiviral Protects cells	2-3 days	1 month
Without Papilloma - General	Damage to the skin and mucous membranes caused by the Human Papilloma Virus. It is recommended to use with the "Clean Skin" complex.	Antiviral Protects cells	2-3 days	1 month

Without Proteus	Gastritis, diarrhea, abdominal pain, vomiting, exacerbation of dermatitis, allergies, problems in the genitourinary system, long non-healing wounds.	Antibacterial Anti-inflammatory Antitoxic	1-2 days	14-28 days
Without Pseudomonas aeruginosa	Local purulent-inflammatory processes in the soft tissues, organs of hearing, lungs, joints, etc. Also for people who are in hospital for a long time.	Antibacterial Anti-inflammatory Antitoxic	1-2 days	14-28 days
Without Rickettsia	Tick bites, especially in Asia and Australia, typhus, tick-borne fevers, etc.	Antibacterial Anti-inflammatory Protects cells	1-2 days	14-28 days
Without Rotavirus	Normalizes the condition and stops dehydration in case of dysbacteriosis caused by rotavirus infection.	Antiviral Protects cells	1-2 days	14-21 days
Without Salmonella	Normalizes the condition during toxic infection, which appeared as a result of eating foods with pathogenic microorganisms.	Antibacterial Anti-inflammatory Antitoxic	1-2 days	14-28 days
Without Shigella	Normalizes the condition and stops dehydration with diarrhea caused by the presence of this bacterium.	Antibacterial Anti-inflammatory Protects cells	1-2 days	14-28 days
Without Toxoplasma	Parasitic invasion caused by intracellular protozoa and accompanied by the development of the inflammatory process in the lymph nodes, liver, brain, lungs, heart, muscles, etc.	Anti-protozoan Anti-inflammatory	2-3 days	1 month
Without Trematodes - General 1	Damage to the liver, pancreas, lungs, circulatory and genitourinary systems, toxic-allergic reactions caused by a number of flukes: feline, hepatic, pulmonary, lanceolate, etc. Programs are used together with each other.	Antiparasitic Protects cells Antitoxic	2-3 days	1-2 months
Without Trematodes - General 2				
Without Trichomonas	Inflammatory processes of the genitourinary sphere, pain during intercourse, itching and burning, discharge and unpleasant odor.	Antiprotozoal Anti-inflammatory	2-3 days	1 month
Without Ureaplasma	Inflammatory processes of the genitourinary sphere, impaired reproductive function, pain in the lower abdomen, rapid and painful urination.	Anti-protozoan Anti-inflammatory	2-3 days	1 month
Without Yersinia	Toxic-allergic reaction that occurs when hygiene measures are not followed and accompanied by skin rashes, a violation of the digestive tract, inflammation of the joints.	Antibacterial Anti-inflammatory	1-2 days	14-28 days
Stop Coronavirus - New	Inflammation of the mucous membranes of the nose, throat, lungs, weakness, decreased sense of smell and hearing. Improved and advanced program. It is advisable to use according to the methodology of the "Stop Coronavirus" complex.	Antiviral Protects cells Anti-inflammatory	1-2 days	1 month

Bacterial pneumonia	Inflammation of the respiratory system caused by Streptococcus pneumoniae, Chlamydomyphila pneumoniae, Mycoplasma pneumoniae, Klebsiella pneumoniae, etc., accompanied by fever, weakness, headache, cough, shortness of breath, pain in the chest, muscles and joints.	Antibacterial Anti-inflammatory	1-2 days	1 month
Without cough	In the presence of both dry and wet cough with various infections. To get the best effect, it is recommended to use in conjunction with the "Anti-cold" and "Free Breath" programs on the DeVita Ritm device.	Anti-inflammatory Decongestant Relieves from spasms	Within 1 day	1 month
Without pneumonia	In the presence of respiratory tract infection, cough, general weakness, fatigue, drowsiness, shortness of breath, chest pain. It is recommended to use with other anti-inflammatory programs aimed at normalizing the function of the respiratory system.	Anti-inflammatory Decongestant	2-3 days	1 month
Lower back without inflammation	For lower back and sacral pain.	Anti-inflammatory Anesthetic Improves trophic	2-3 hours	1 month
Stop acne bacteria	In the presence of acne	Antibacterial Anti-inflammatory	5-7 days	1 month
Without microsporium	When ringworm (trychophytosis) appears on the scalp areas of the skin. And in order to prevent infection through contact with sick people, their personal hygiene items, clothing. Or when interacting with sick animals.	Antimycotic Anti-inflammatory	3-5 days	1-2 months
No onychomycosis	When the nail plates are affected by fungus. And in order to prevent infection when visiting public baths, saunas, swimming pools, beaches.	Antimycotic Anti-inflammatory	5-7 days	3-6 months
Zygomycetes, stop!	To reduce the likelihood of infection by fungal flora in certain chronic diseases.	Antimycotic Anti-inflammatory	2-3 days	1-2 months
Nails without fungus	When fungus affects the skin of the feet and nails. And in order to prevent infection when visiting public wet places, violation of personal hygiene.	Antimycotic Anti-inflammatory	5-7 days	3-6 months
Without trichophyton	When the fungus infects smooth skin. And in order to prevent infection by contact with infected people with their belongings or contact with sick animals.	Antimycotic Anti-inflammatory	5-7 days	1 month
Mycosis fungoides	To reduce the likelihood of infection by fungal flora in certain chronic diseases.	Antimycotic Anti-inflammatory	2-3 days	1-2 months
Solar keratosis	To prevent the spread or appearance of flaky age spots, especially in individuals who have been exposed to sun or photo radiation for long periods of time.	Anti-inflammatory Protecting cells	5-7 days	2-3 months
Stop warts	To prevent the spread of the virus in the body and reduce the formation of skin growths.	Antiviral Anti-inflammatory	5-7 days	1 month

Stop pimples	In the presence of inflammatory foci on the skin of the face and body.	Antibacterial Anti-inflammatory	2-3 days	14-28 days
Fingers without inflammation	If there is an inflammatory process in the finger area, caused by injuries sustained while performing a manicure, or injection, burr removal, ingrown nail.	Anti-inflammatory Anti-edema Accelerating regeneration	2-3 days	14-28 days
No scleroderma	To reduce the likelihood of developing the disease if there is a hereditary predisposition.	Anti-inflammatory Stabilising	5-7 days	6-12 months
Erysipelas, stop	To reduce the area of spread and prevent the development of infection when the integrity of the skin and mucous membranes is compromised.	Antibacterial Anti-inflammatory	2-3 days	1 month
Relieve psoriasis	To improve quality of life and reduce complications when the disease is present.	Anti-inflammatory Stabilising	2-3 days	1-2 months
Leprosy	In the presence of infection and to prevent contamination by contact with sick people and monkeys.	Antibacterial Anti-inflammatory	2-3 days	14-28 days
Without Epidermophyton	When a fungal infection is present on any parts of the human body and to prevent infection through contact with a sick person.	Antimycotic Anti-inflammatory	5-7 days	1 month
Restoration of blood circulation	In circulatory disorders associated with chronic or infectious diseases.	Anti-inflammatory Antitoxic Normalizing blood circulation	1-2 days	1 month
Healthy spleen	When immunity and organ problems are lowered especially when under prolonged stress.	Anti-inflammatory Immunostabilizing Antitoxic	2-3 days	1 month
Healing	For recovery of the body after illnesses or injuries.	Anti-inflammatory Antitoxic Accelerating regeneration	2-3 days	1-2 months
Gardnerella, stop!	To prevent the development of inflammatory processes in the genitourinary sphere, with hormonal and physiological changes, promiscuous sexual relations, improper use of personal hygiene products, etc.	Antibacterial Anti-inflammatory	2-3 days	14 days
Men's power	With erectile dysfunction, violation of the reproductive system in general and the prostate gland in particular.	Anti-inflammatory Improves trophic	2-3 days	6-12 months
Without actinomycetes	To prevent the spread of infection, as a result of infection through damaged skin when working with earth. Agricultural workers to use to prevent infection.	Antimycotic Anti-inflammatory	2-3 days	14 – 28 days
Stop gonococcus	A program for sexually active people to prevent infection and inflammatory process of the genitourinary sphere, as well as to improve the condition of the disease.	Antibacterial Anti-inflammatory	2-3 days	14 – 28 days
Stop parvovirus	For relief from joint pain, chronic anemia, weakened immunity.	Antiviral Anti-inflammatory	2-3 days	14 days

Without tuberculosis	As an additional method to prevent infection and inflammation, especially in persons at risk (health care workers, shelters and correctional facilities).	Antibacterial Anti-inflammatory	2-3 days	14-28 days
Without brucella	Eating insufficiently heat-treated dairy and meat products; close contact with farm animals. People keeping cows, goats, sheep are at risk	Antibacterial Anti-inflammatory	5-7 days	3-5 weeks
Skin without acne	In the presence of signs of inflammation on the skin (acne), formed as a result of changes in hormonal background (teenagers), stress, excessive ultraviolet light, use of inappropriate cosmetics.	Antibacterial Anti-inflammatory	5-7 days	1-2 months
Fungus-free skin	To prevent fungal infection in case of poor hygiene, chronic skin diseases. It is desirable to use in conjunction with the programs "Without Epidermophyton", "Without Trichophyton".	Antimycotic Anti-inflammatory Anti-itching	5-7 days	1 month
Straight spine	When the muscle corset of the back is weak; sedentary behavior; uneven physical activity, diseases of the musculoskeletal system.	Anti-inflammatory Anesthetic Improves trophic	2-3 hours	1 month
Stop pain (lower back)	In pain of various origins in the lumbar region.	Anti-inflammatory Anesthetic	2-3 hours	1 month
Without allergy new	In the presence of allergic manifestations in persons with hereditary or occupational predisposition.	Antitoxic Anti-allergic Anti-edema Anti-inflammatory Immunostabilizing	1-2 days	1-2 months
Without salmonella	When using insufficiently heat-treated fish for food, in contact with household appliances for cutting fish, non-compliance with personal hygiene.	Antiparasitic	5-7 days	1 month
Stop dementia	To prevent a decrease in mental abilities, especially in the elderly.	Anti-inflammatory Antitoxic Regulating	5-7 days	6-12 months
Stop Parkinson	As an additional means of slowing down the development of the disease in the elderly.	Anti-inflammatory Antitoxic Stabilising	5-7 days	6-12 months
Stop pain (injury)	For all types of injuries. For the best effect, the "Antiseptic" program can be added.	Anti-edema Anti-inflammatory Anesthetic Accelerating regeneration	During first 24 hours	2-3 weeks
Strong nerves	Persons suffering from mood swings, irritability, a state of prolonged fatigue.	Anti-inflammatory Accelerating regeneration Anti-stress	2-3 days	1 month
Good sleep	When the quality of sleep is disturbed, short duration of sleep.	Antitoxic Regulating	2-3 days	1 month
Calm bowel	For abdominal bloating, rumbling, flatulence, stool problems.	Anti-inflammatory Anesthetic Antitoxic	1-2 days	6-12 months

Healthy stomach	With pain in the stomach, heartburn, functional disorders of the stomach.	Anti-inflammatory Anesthetic Accelerating regeneration	1-2 days	1-4 months
Duodenitis, stop!	If you have pain in the upper abdomen, the presence of problems with the initial part of the intestine. Preferably used with the "Healthy Stomach" program.	Anti-inflammatory Anesthetic	1-2 days	1-4 months
Healthy pancreas	When the pancreas is dysfunctional.	Normalizing Anti-inflammatory	3-4 days	1-2 months
Blood sugar control	When the pancreas is malfunctioning and sugar levels are elevated.	Normalizing Anti-inflammatory	3-4 days	6-12 months
Stop diabetes	As a supplemental remedy in order to maintain good health.	Stabilising	5-7 days	6-12 months
Small intestine	In functional disorders of the intestine.	Anti-inflammatory Protecting cells	1-2 days	6-12 months
Intestines without disturbances	With functional disorders of the intestine, with transmitted infectious diseases of the intestine.	Anti-inflammatory Anesthetic Normalizing motility	1-2 days	6-12 months
Without hemorrhoids	If there is discomfort, accompanied by a feeling of heaviness and burning in the anus, bleeding at the end of defecation.	Anti-inflammatory Anti-edema Anesthetic	5-7 days	1-2 months
Stop pelvic inflammation	In inflammatory processes of the genital organs in men and women.	Anti-inflammatory Anesthetic	2-3 days	1 month
Stop chickenpox	To speed up the healing process and to prevent infection.	Antiviral Anti-edema	2-3 days	14-28 days
Stop rubella	To speed up the healing process and to prevent infection.	Antiviral Anti-edema	2-3 days	14-28 days
Without mumps	To speed up the healing process and to prevent infection.	Antiviral Anti-edema	2-3 days	14-28 days
Stop scarlet fever	To speed up the healing process and to prevent infection.	Antibacterial Anti-inflammatory	2-3 days	14-28 days
Stop measles	To speed up the healing process and to prevent infection.	Antiviral Anti-edema	2-3 days	14-28 days
No diphtheria	To speed up the healing process and to prevent infection.	Antibacterial Anti-inflammatory	2-3 days	14-28 days
Stop cholera	To speed up the recovery process and to prevent infection, persons visiting countries in Africa, South America, and India.	Antibacterial Anti-inflammatory Protecting cells	2-3 days	14-28 days
Stop whooping cough	To speed up the healing process and to prevent infection.	Antibacterial Anti-inflammatory	2-3 days	14-28 days
Without constipation	To improve the process of defecation, reduce discomfort.	Anti-inflammatory Normalizing motility	1-2 days	6-12 months
Head blood circulation	For memory impairment, presence of headaches, dizziness, decreased attention and visual acuity.	Anesthetic Normalizing blood circulation	1-2 days	1 month
For women	To improve the condition in the presence of inflammation of the reproductive organs.	Anti-inflammatory Anti-edema	2-3 days	1-2 months

Stop spasm (muscles)	When the muscle corset is weak, being in an uncomfortable position, sudden lifting of heavy weights, problems with the musculoskeletal system.	Anti-inflammatory Anesthetic Anti-edema	In 2-3 hours	1 month
No motion sickness	To reduce discomfort when driving in transport.	Antispasmodic Soothing Stabilising	20-30 min.	1 month
Stop spasm (intestine)	For intestinal disorders, impaired motility.	Antispasmodic Normalizing motility	1-2 days	6-12 months
Stop conjunctivitis	For inflammation of the mucous membrane of the eye, which is accompanied by redness, irritation or lacrimation.	Antibacterial Antiviral Anti-inflammatory Anti-edema Antitoxic	1-2 days	14-21 days
Muscles without clamps	When the muscle corset is weak, being in an uncomfortable position, sudden lifting of heavy weights, problems with the musculoskeletal system.	Antispasmodic Anti-inflammatory Antitoxic	20-30 min.	1 month
Stop fatigue	With a feeling of weakness, fatigue, lethargy, arising after prolonged stress, fatigue, insomnia.	Anti-stress Restoring energy	2-3 days	1 month

DeVita AP (automatic programs)				
Name of the program	In which cases the program can be used	Effect	First results	Lasting effect
Mode 1 - automatic	Viral and protozoan loads. Optimal disease prevention when changing climatic zones, visiting Asian countries.	Antiviral Anti-inflammatory Anti-protozoan Antitoxic	1-3 days	2-4 weeks
Mode 2 - automatic	Toxic stress caused by streptococcus and staphylococcus. Effective both for colds and for the prevention of coccal infections.	Antibacterial Anti-inflammatory Antitoxic	2-3 hours	10-14 days
Mode 3 - automatic	Bacterial burden in the digestive tract and the genitourinary system.	Antiviral Anti-inflammatory Antibacterial Antitoxic	1-3 days	2-4 weeks
Mode 4 - automatic	Presence of mycotoxins in the organism formed by mold and yeast. Reduces the risk of accumulation of carcinogenic factors.	Antifungal Anti-inflammatory Antitoxic	2-3 days	1-2 months
Cleansing - automatic	Violation of the lymphatic system, swelling, decreased immunity.	Antiseptic Antitoxic Lymphatic drainage Decongestant	Within 1 day	1 month
No parasites - automatic	Parasitic burden in the liver, pancreas, intestines, as well as toxic load caused by the vital activity of these microorganisms.	Antiparasitic Antitoxic	2-3 days	1 - 2 months

No flu - automatic	Inflammatory processes caused by various strains of the influenza virus.	Antiviral Antipyretic Anesthetic Anti-inflammatory Antitoxic	2-3 hours	5-10 days
Stop herpes S - automatic	In case of vesicles forms on the mucous membranes of the lips, genitals, eyes, mouth, skin, which are formed due to activation of the Herpes Simplex virus.	Antiviral Anti-inflammatory Antipruritic Antitoxic	Within 1 day	1 month
Stop herpes Z - automatic	Shingles - skin rashes, accompanied by severe pain along the sensory nerve.	Antiviral Anti-inflammatory Antipruritic Anesthetic Antitoxic	Within 1 day	1 month
Without cold - automatic	Inflammation of the nose, throat, bronchi.	Antiviral Anti-inflammatory Antitoxic	Within 1 day	5-7 days
Support immune system - automatic	Effective for preventing colds infections during hypothermia and during mass illnesses.	Antiviral Antitoxic	2-3 hours	5-7 days
Without helminths - automatic	Effective for the prevention of helminthiasis in children and adults.	Antiparasitic Antitoxic	2-3 days	1 - 2 months
Weight Reduction - automatic	Excess weight, resulting from viral complications. Puffiness.	Antiviral Antitoxic	1-2 days	4-6 months
Reduce Points - automatic	Violation of the lymphatic system, fluid retention, decreased immunity due to increased intoxication.	Antitoxic Lymphatic drainage Decongestant	1-2 days	4-6 months
Cell Protection 1	For removal of the general viral, herpetic and bacterial toxic loads. Reduces the activity of viruses and the negative effect of streptococcal toxins.	Antiviral Antibacterial Antitoxic	3-4 days	4-6 months
Cell Protection 2	Wrong lifestyle, great stress and physical exertion, living in adverse ecological areas. It is recommended to use the program within the application scheme of the "Healthy Cell" complex.	Antiviral Anti-protozoan Anti-inflammatory Protects cells	Within 1 week	6-12 months
Cell Protection 3	The program is effective against staphylococcal and chlamydial infections, and also reduces the negative impact of protozoan lesions of the genitourinary tract.	Antiviral Antibacterial Anti-protozoan Anti-inflammatory	3-4 days	4-6 months
Cell Protection 4	Fungal load and in order to prevent mutations and negative cell degeneration. It is recommended to use the program within the application scheme of the "Healthy Cell" complex.	Antifungal Anti-inflammatory Antitoxic Protecting cells	Within 1 week	6-12 months
Lyme 1 - automatic	Removal of the general viral, herpetic and bacterial toxic load. Reduces the activity of viruses and the negative effect of streptococcal toxins.	Antiviral Antibacterial Antitoxic	3-4 days	4-6 months

Lyme 2 - automatic	Tick bites, the detection of tick-borne borreliosis or Lyme disease. It is recommended to use the program within the application scheme of the "Lyme disease" complex.	Antiviral Antibacterial Anti-protozoan Anti-inflammatory	3-4 days	6-12 months
Lyme 3 - automatic	The program is effective against staphylococcal and chlamydial infections, and also reduces the negative impact of protozoan lesions of the genitourinary tract.	Antiviral Antibacterial Anti-protozoan Anti-inflammatory	3-4 days	4-6 months
Lyme 4 - automatic	Tick bites, the detection of tick-borne borreliosis or Lyme disease. It is recommended to use the program within the application scheme of the "Lyme disease" complex.	Antibacterial Antifungal Anti-inflammatory Antitoxic	3-4 days	6-12 months
Restoration 1 - automatic	Inflammation and damage to the mucous cavity, with dental interventions, an unbalanced diet.	Anesthetic Decongestant Anti-inflammatory Accelerates regeneration	1-2 days	1 month
Restoration 2 - automatic	After surgical interventions, with any damage to the integrity of the skin and mucous membranes, with inflammatory processes.	Anesthetic Decongestant Anti-inflammatory Accelerates regeneration	Within 1 day	2-4 weeks
Healthy Gums - Automatic	Infections and injuries of the oral cavity. It is recommended to use according to the application scheme of the "Healthy Teeth" complex	Decongestant Anti-inflammatory Accelerates regeneration	1-2 days	4-6 months
Nerve Regeneration - automatic	Negative disorder of the nervous system, a violation of the integrity of the nerve fiber caused by tick bites or other factors.	Anti-inflammatory Decongestant Anesthetic Protects cells	Within 1 week	6-12 months
Healthy Breathing - automatic	Diseases of the respiratory tract: nose, throat, bronchi, lungs.	Antiviral Antibacterial Antitoxic Anti-inflammatory	1-2 days	1 month
No motion sickness automatic	To relieve nausea attacks and improve the condition when driving in any type of transport.	Antispasmodic Soothing Stabilising	20-30 min.	1 month
SOS! Allergy automatic	To relieve discomfort and improve respiratory allergies to dust, pollen, odors, etc.	Antibacterial Antiviral Antitoxic Anti-allergic Anti-edema Anti-inflammatory	1-2 days	1-2 months
Restoration 3 automatic	After injuries or infectious diseases to accelerate regeneration processes.	Anti-inflammatory Antitoxic Accelerating regeneration Normalizing blood circulation	2-3 days	1-2 months
Deep sleep automatic	To improve the quality and duration of sleep.	Anti-inflammatory Accelerating regeneration Anti-stress Antitoxic Regulating	2-3 days	1 month

Stop brain aging automatic	For older people with decreased cognitive functions.	Anti-inflammatory Antitoxic Regulating Normalizing blood circulation	5-7 days	6-12 months
Stop fatigue automatic	To maintain a normal physiological and psychological state during strenuous work, stress.	Anti-inflammatory Accelerating regeneration Anti-stress Normalizing blood circulation Restoring energy	2-3 days	1 month
Anti-inflammatory (female) automatic	As an additional method to relieve inflammation in diseases of the reproductive system.	Anti-inflammatory Anti-edema Anesthetic Normalizing	2-3 days	1-2 months
Anti-inflammatory (male) automatic	As an additional method to relieve inflammation in diseases of the reproductive system.	Anti-inflammatory Normalizing trophics	1-2 days	1 month
Gastro active automatic	To support the stomach, gallbladder, pancreas.	Anti-inflammatory Anesthetic Accelerating regeneration Normalizing	1-2 days	6-12 months
Bowel without irritation automatic	For flatulence, bloating, intestinal disorders.	Anti-inflammatory Anesthetic Normalizing motility Accelerating regeneration	1-2 days	6-12 months
Without constipations automatic	To relieve discomfort during defecation, improving the evacuation function of the intestine.	Anti-inflammatory Anesthetic Anti-edema Normalizing motility	2-3 days	6-12 months
Skin without pimples automatic	In the presence of acne.	Antibacterial Anti-inflammatory Antitoxic	5-7 days	1 month
Healthy nails automatic	With inflammation of the skin around the nails and between the fingers, itching, changes in the color and thickness of the nail plates.	Antimycotic Anti-inflammatory Antitoxic Anti-itching	7-14 days	3-6 months
Stop skin fungus automatic	For inflammation of the scalp, in the body folds and exposed areas, itching, change and thickening of the skin and hair texture.	Antimycotic Anti-inflammatory Antitoxic Anti-itching	5-7 days	1 month
Lower back without pain automatic	For musculoskeletal problems.	Anti-inflammatory Anti-edema Anesthetic	2-3 hours	1 month
Healthy back automatic	With problems of the musculoskeletal system, weakness of the muscular corset.	Anti-inflammatory Anti-edema Anesthetic Antitoxic Improves trophic	2-3 hours	1 month

The combined use of all three DeVita devices is the key to a healthy and active life. Only by using all devices will your organism be completely cleansed of toxins, your organs will begin to function harmoniously, and you will feel cheerfulness and a surge of strength.

Also, the necessary smart cellular nutrition will establish vital processes.

The combined use of the technologies and smart cell nutrition supplements made by DEHolding is the key to health and longevity.
